STRAWBERRIES HEALTHY VIRUS FREE Guaranteed PLANTS

EVERBEARING VARIETIES

RED RICH No. 4002. (Plant Patent No. 993). The best of the everbearers. Delicious, honey sweet flavor. Large, firm, red all the way through. Heavy yielder. Stays firm even after freezing. Frost resistant. Dark green, tall plants that make a beautiful garden border.

OGALLALA No. 4003. A new hybrid that combines the pungent, sweet flavor of wild strawberries with the yield of the large everbearing type berry. Supply is still limited. Healthy, virus free plants. Will bear many times first year they are planted. Large, bright red berries.

SUPERFECTION No. 4031. Extra large round shaped berries. Solid enough for shipping. Good all-purpose variety for canning, freezing, or preserving. Extra sweet flavor. Bears from spring until early fall.

STREAMLINER No. 4030. Plant this spring and get berries this summer and fall. Next year will start producing in early spring and right on through to growing season. Large sweet berries with that real strawberry flavor. Healthy virus free stock.

GEM No. 4000. A dependable popular everbearing variety. Healthy, sturdy plants with plenty of strong runners. Produces well during spring, summer and until frost in the fall. Large size, extra sweet flavored berries.

Strawberries Shipped Spring or Fall

BLACKBERRIES Be sure to include a few blackberry bushes in your berry garden. They ripen right after raspberries and are delicious eaten fresh, in pies or in jams and preserves. They thrive everywhere except the very coldest area. We recommend planting in good garden soil 3 to 5 feet apart in rows 6 feet apart. Mulching always pays. In the spring, spray just before the buds open with lime sulphur or Bordeaux mixture.

EBONY KING No. 6814. New improved variety. Heavy crops of deliciously flavored berries year after year. Sturdy upright growing bushes. Unusually hardy.

ALFRED No. 6815. Early ripening. Long bearing. Berries are mammoth size, sweet flavored, and almost seedless.

ELDORADO No. 6816. Late ripening but heavy producing. Berries are jet black, sweet and almost coreless. Very hardy and resistant to rust.

BLACKBERRY PRICES

VARIETY	5	10	25	100
EBONY KING	2.25	4.25	9.75	37.00
ALFRED	1.75	3.75	13.75	
ELDORADO	1.75	3.75	13.75	

THORNLESS BOYSENBERRY—NO. 6801

Immense, delicious berries that ripen over a period of 6 to 8 weeks. Very easy to grow, requiring little care. Planted in the spring they make a quick growth and should produce a heavy crop the following year. The fruit is a rich, red wine color, unsurpassed in flavor. Berries are often 2 inches long. Wonderful for eating fresh, for canning, or preserves. There is nothing finer than the tangy flavor of fresh Boysenberry pie. Widely adapted and will grow almost anywhere. Hardy in practically every area. Grade No. 1 bushes. Canes are practically thornless, making the berries easy to pick. POSTPAID PRICES: 10 for \$2.15; 25 for \$4.25; 100 for \$15.50.

GOOSEBERRIES

Our bushes are all 2-yr.; field grown, grade No. 1 stock. Plant about 4 ft. apart either spring or fall. Easy to raise and require very little care, being hardy for any area. Gooseberries are delicious when used in pies, for canning or freezing.

PIXWELL No. 6840. Branches have few thorns so berries are easy to pick. Large size, well flavored fruit. Hardy anywhere and easy to grow. Grade No. 1, 2 Yr. Plants. Each 98c; 5 for \$4.25 POSTPAID.

DOWNING No. 6841. A dependable heavy bearing variety. Berries are very sweet when fully ripe—tart when green. Excellent for pies, jellies, or jams. Extremely hardy, vigorous plants. Grade No. 1, 2 yr. plants. Each 98c; 5 for \$4.25 POSTPAID.

GOOSEBERRY GARDEN No. 6845. Sturdy, 2 year old field grown plants. Includes 2 Pixwell, 1 Downing. All 3 \$2.45 POSTPAID.

JUNE BEARING VARIETIES

DUNLAP No. 4005. By far the most popular and best known variety in the midwest area. Dependable, easy to raise. Ripens early in midseason. Medium large, delicious berries. Drought resistant and self pollinizing.

BLAKEMORE No. 4004. The earliest June strawberry. Very popular everywhere. Solid firm fruit ideal for canning or freezing. Wonderful for preserving too. Ripen uniformly to a brilliant red color.

ROBINSON No. 4032. A heavy producing berry of extra large size. Ripens just about the time that Blakemore quits. Unsurpassed for eating fresh, preserving, or freezing. Particularly recommended for cooler areas, but will do well most anywhere.

PREMIER No. 4007. Our earliest ripening berry. Large sized fruit and a real favorite in the midwest. Healthy virus free plants. Long rooted and highly productive. Delicious sweet flavor.

RASPBERRIES One of the most delicious yet easiest to grow of all small fruits. Our field grown No. 1 grade plants start bearing heavily within two years. Raspberries are hardy throughout the entire country with the possible exception of extreme northern areas. Most of the red varieties are hardy for any area. A patch of 15 or 20 plants takes up very little space. We recommend planting about 3 or 4 feet apart in rows 6 feet apart, in spring or fall.

DURHAM No. 6700. Bears delicious fruit from early summer until frost. Bright red berries of medium size. Delicious served fresh with sugar and cream or in desserts. Canes seldom grow over 4 feet high.

LATHAM No. 6704. Heavy producing plants with giant sized dark red berries. Extra hardy, vigorous and disease free. Midseason variety.

INDIAN SUMMER No. 6705. First crop ripens in early summer and then bears another crop on new canes in the fall. Large sized, deep red berries. Should begin to bear fruit this season. If planted in the fall would start to bear fruit the following season. Delicious flavor.

QUICK CROP BERRIES

Sturdy heavier caned plants. Bear fruits sooner than the other sizes priced above. No. 6710 LATHAM. 5 for \$1.75; 10 for \$3.25; 25 for \$6.95. No. 6711 CUMBERLAND. 5 for \$2.50; 10 for \$4.50; 25 for \$10.00. ALL POSTPAID.

CURRENTS

Currents are extremely hardy anywhere and prefer moist well drained soil if possible although they will produce satisfactorily on moist soil types. They are very easy to grow and should be planted 4 ft. apart and if you prefer to have them in rows, they should be about 5 ft. apart. They can be set out in spring or fall.

REDLAKE CURRANT No. 6830. Ripens early to midseason. Long bunches of bright red berries which make wonderful jelly. Easy to grow and hardy. 2-yr. Grade No. 1. Each 55c; 5 for \$2.35 POSTPAID.

PERFECTION CURRANT No. 6831. Heavy producing sturdy upright canes. Large clear red clusters of berries containing few seeds. 2-yr. Grade No. 1 Each 60c; 5 for \$2.50 POSTPAID.

Current Garden of 3

No. 6833. Two year old field grown grade No. 1 bushes. Includes two Redlake and one Perfection. All three for \$1.35. POSTPAID.

QUICK CROP REDLAKE CURRANT

Large vigorous plants bear fruit sooner. Each 85c; 5 for \$3.50 POSTPAID.

BERRY SET

Get more and bigger berries. For all types including strawberries, blackberries and raspberries, just dissolve in water and use according to directions. Easy to use. 1 oz. 50c (makes 4 gal. spray); 3 oz. \$1.00 (makes 12 gal. spray). POSTPAID.

CUMBERLAND No. 6706. (Black) Midseason variety with exceptionally large berries. Delicious sweet flavored and a favorite black cap for many years.

MORRISON No. 6703. A wonderful variety for both canning and freezing. Berries are fine flavored and less seedy than other blacks.

BLACKHAWK No. 6702. Developed by Iowa State University at Ames, Iowa, and released in 1955. Has outyielded all other varieties in State supervised tests. Rich sweet giant sized berries.

SODUS (Purple) NO. 6712

A cross between red and black. Large firm berries with distinctive flavor. Vigorous, productive No. 1 grade plants. Equally good fresh, frozen or in jams. Very hardy. For 10 \$2.50; for 25 \$5.56; for 100 \$19.50 POSTPAID.

Field grown No. 1 grade plants, 5 Indian Summer, 5 Cumberland, 5 Sodus. All 15 only \$2.95 POSTPAID.

BLUEBERRIES

Blueberries grow best in sandy acid soil. However, with proper care and preparation, they can be grown practically anywhere. Any soil can be made slightly acid with the addition of a little aluminum sulphate. Heavy mulching with peat moss will also have the same results. Blueberries will last many years and are hardy for practically any area.

JERSEY No. 6820. Ripens mid-season. Big extra sweet light blue colored berries. Upright, vigorous growing bushes.

RUBEL No. 6819. Heavy bearing, vigorous growing bushes. Extra large berries. Late maturing. We recommend including one of each variety for best results.

RANCOCCUS No. 6818. Our earliest variety. Be sure to include these with any of the other varieties that you buy for a good set of berries. Excellent sweet flavored fruit for all round use.

STRINGLESS YELLOW POD BUSH BEANS

No. 126—BRITTLE WAX. (53 days). Very tender, long yellow pods. Vigorous upright plants that keep pods off the ground. Easy to grow, big yielder and excellent flavor. Large Pkt. 15c; 1/2 lb. 45c; 1 lb. 75c; 5 lbs. \$3.25 POSTPAID.

No. 127—PENCIL POD BLACK WAX. (51 days). Dependable producer and disease resistant. Tender, absolutely stringless. Extra long bright yellow pods. Lge. Pkt. 15c; 1/2 lb. 40c; 1 lb. 75c; 5 lbs. \$3.20 POSTPAID.

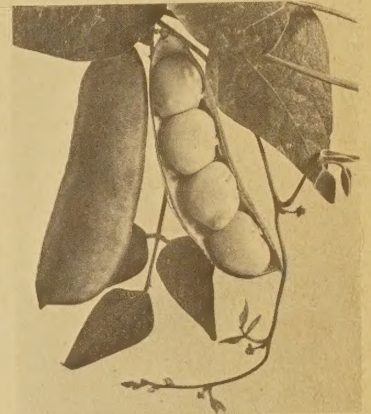

No. 130—TOP NOTCH GOLDEN WAX. (50 days). Very early. Erect strong plants. Improved strain of golden wax. Long yellow tender pods contain no fibers. Large Pkt. 15c; 1/2 lb. 45c; 1 lb. 75c; 5 lbs. \$3.25 POSTPAID.

BUSH LIMA BEANS

No. 137—HENDERSON. (65 days). Best yielding Lima. Small white beans on sturdy short bushes. Rich buttery flavor. Excellent freezer. Lge. pkt. 15c; 1/2 lb. 40c; 1 lb. 65c; 5 lbs. \$2.85 POSTPAID.

No. 138—IMPROVED FORDHOOK. (72 days). All America winner. Pods in clusters of 4 to 8 each. Lge. white full flavored bean. Vigorous strong bushes. Lge. pkt. 15c; 1/2 lb. 45c; 1 lb. 80c; 5 lbs. \$3.20 POSTPAID.

No. 139—BURPEE'S BUSH LIMA. (77 days). Dwarf plants that bear big full pods right up until frost. Excellent flavor, good yielder, dependable variety. Lge. pkt. 15c; 1/2 lb. 45c; 1 lb. 80c; 5 lbs. \$3.20 POSTPAID.

DRY SHELL BEANS

No. 125—DWARF HORTICULTURAL. (60 days). Long thick flat pods. A dependable heavy yielder and we think best of the green shell beans. Lge. Pkt. 15c; 1/2 lb. 45c; 1 lb. 80c; 5 lbs. \$3.00 POSTPAID.

No. 147—MICHIGAN NAVY. (90 days). The old favorite soup bean. Vigorous plants that are heavy yielding. Pods carry well off the ground. Favorite variety. Lge. Pkt. 15c; 1/2 lb. 35c; 1 lb. 60c; 5 lbs. \$2.60 POSTPAID.

No. 150—RED KIDNEY. (95 days). Everyone's favorite. Deliciously flavored large reddish brown beans. Excellent for baking or soup. Easy to grow. Lge. Pkt. 15c; 1/2 lb. 40c; 1 lb. 70c; 5 lbs. \$3.10 POSTPAID.

GARDEN NITROGIN—Greatly increases yields. Easy to use. For Beans, Peas, Sweet Peas. 1 Pkt. is enough to treat 3-4 lbs. of seed. ONLY 25c POSTPAID.

ONIONS CULTURAL RECOMMENDATIONS

Sow onion seed just as early as weather conditions permit. Seeds germinate best in cool weather. Sow in well prepared seed bed in rows 12 in. apart. Thin out when 3-5 in. high. Plants removed can be used for green onions when transplanted.

Pkt. sows 15 ft.; 1 oz. 200 ft.

No. 425—YELLOW SWEET SPANISH. (110 days). Firm fleshed, juicy and sweet. Large almost true globe shape. Amber yellow color. Fine keeper. Resistant to thrip. Very popular variety. Trial packet 15c; 1 oz. 70c; 1/4 lb. \$1.80 POSTPAID.

No. 431—YELLOW GLOBE. (105 days). Very productive. Narrow neck, large globe size. Deep orange yellow color. Splendid keeper. Flesh just slightly yellow tinged and a little stronger flavored than Sweet Spanish. Trial packet 15c; 1 oz. 70c; 1/4 lb. \$1.70 POSTPAID.

No. 434—WHITE SWEET SPANISH (110 days). The best large, white onion, globe shaped, glistening white, flesh is crisp, juicy and very mild. Stores well. Trial packet 15c; 1 oz. 75c; 1/4 lb. \$2.00 POSTPAID.

No. 445—HYBRID F-1 YELLOW SWEET SPANISH. (100 days). Bigger, better and earlier than the standard varieties. Dependable producer. Large uniform size, very sweet and mild. Trial packet 25c; 1 oz. \$1.00; 1/4 lb. \$3.00 POSTPAID.

BEETS

PLANTING RECOMMENDATIONS: 1 oz. sows 90 ft. Rows should be planted 24 in. apart. Seed should not be covered over 1 in. deep. When plants are 2 to 3 in. tall they should be thinned to 4 in. apart. Beets can be planted very early with new plantings every 2 or 3 weeks until the first of August.

156—Ruby Queen. 1958 All America winner. Uniform, round, medium sized extra delicious. Best new variety. Pkt. 25c; 1 oz. 45c; ¼ lb. \$1.25 POSTPAID.

164—Baby Canning. (54 days). Tender sweet perfect size for pickling. Pkt. 15c; 1 oz. 35c; ¼ lb. 90c POSTPAID.

155—Crosby's. (53 days). Deep red, perfectly shaped and uniform size. Excellent for bunching, canning or pickling. Very early. Pkt. 15c; 1 oz. 35c; ¼ lb. 90c POSTPAID.

154—Early Blood Turnip. (55 days). Large semi-flat uniform size. Good flavor, smooth skin. A splendid keeper. Pkt. 15c; 1 oz. 40c; ¼ lb. \$1.00 POSTPAID.

158—Swiss Chard. (55 days). Large light green leaves grow continuously throughout the summer. Deliciously flavored when cooked for greens. The more you use the heavier the plants produce. Pkt. 15c; 1 oz. 30c; ¼ lb. 75c POSTPAID.

CARROTS

1 oz. of seed sows 100 ft. Cover ½ in. in well prepared soil. Rows should be 2 ft. apart. When plants are up about 2 in. they should be thinned down to 3 in. apart. Easy to grow.

210—Gold Pak. (75 days). An excellent new all America winner. Long, tender and smooth. Fine grade sweet flavored. Pkt. 20c; ½ oz. 40c; 1 oz. 75c POSTPAID.

201—Oxheart. (75 days). Short extra thick. Deliciously flavored. Best variety for heavy soil. Easily pulled. Pkt. 15c; ½ oz. 25c; 1 oz. 45c POSTPAID.

204—Danvers Half-Long. (72 days). A favorite with home gardeners and commercial growers. An excellent keeper. Crisp tender sweet flavored flesh. Pkt. 15c; ½ oz. 30c; 1 oz. 50c POSTPAID.

205—Chantenay. (68 days) An excellent early fine flavored type. Coreless and tender. Pkt. 15c; ½ oz. 25c; 1 oz. 40c POSTPAID.

216—Tendersweet. (70 days). Very sweet, medium early. Large well shaped roots 7-8 in. long. Pkt. 15c; ½ oz. 30c; 1 oz. 50c POSTPAID.

212—Nantes Coreless. (72 days). Very crisp and tender. One of the best all around varieties. Excellent keeper. Pkt. 15c; ½ oz. 35c; 1 oz. 60c POSTPAID.

PEPPERS

Plant seeds inside or out about two weeks ahead of the time you would expect to set out plants. Peppers need plenty of room and plants should be no closer than 2 ft. apart.

518—California Wonder. Large, tender, thick meaty. Very mild, sweet flavor. Pkt. 20c; ½ oz. 65c; 1 oz. \$1.00 POSTPAID.

515—Ruby King. (68 days). A popular large sweet early pepper. Three lobed, thick fleshed, slightly tapered. Pkt. 15c; ½ oz. 40c; 1 oz. 70c POSTPAID.

512—Cayenne. (70 days). Long tapering deep green shading to brilliant red. A favorite hot variety. Pkt. 15c; ½ oz. 40c; 1 oz. 75c POSTPAID.

517—Pimento. (77 days). Heart shaped, smooth fruits. Dark green color changing to crimson. Thick sweet flavored flesh. Pkt. 15c; ½ oz. 40c; 1 oz. 80c POSTPAID.

Page 6

BE THRIFTY—KEEP HEALTHY

PLAN YOUR VEGETABLE GARDEN NOW

LETTUCE

1 packet sows 50 ft. 1 oz. 150 ft. Order two or three different varieties which will keep you supplied with fresh tender lettuce for several weeks. Head lettuce should be started inside and transplanted about 12 in. apart early in spring.

341—Ruby Lettuce. (45 days). Awarded All America honors. The glossy, dark red color will make any salad look more appetizing. Crisp tender leaves make an excellent garnish. Pkt. 25c; ½ oz. 55c; 1 oz. 95c POSTPAID.

329—Prizehead. (40 days). Reddish Bronze tender leaves. Remains crisp and tender longer than most others. Pkt. 15c; 1 oz. 35c POSTPAID.

526—Black Seeded Simpson. (45 days). Favorite early spring lettuce. Large, crinkled tender leaves. Pkt. 15c; 1 oz. 35c POSTPAID.

327—Early Curled Simpson. (45 days). Light green color. Pkt. 15c; 1 oz. 40c POSTPAID.

323—Bibb (Limestone 55 days). Chef's and gourmet's favorite. Distinctive tender flavor. Leaves smooth, dark green. It will be your favorite once you try it. Pkt. 25c; 1 oz. 90c POSTPAID.

324—Salad Bowl. Another All American selection. Loose leaf, rich green. Delicious flavor. Pkt. 15c; 1 oz. 60c POSTPAID.

330—Chicken Lettuce. (48 days). Early tall growing heavy yielding. Vitamin filled green feed for poultry. Pkt. 15c; 1 oz. 30c; ¼ lb. 70c POSTPAID.

RADISHES

1 packet plants 50 ft. 1 oz. sows 100 ft. Seed should be planted very early with new plantings every 2 weeks apart so that you may enjoy fresh tender radishes for many weeks. Rows should be at least 1 ft. apart.

531—Champion. (27 days). 1957 All America winner. Bright red outside with crisp tender white flesh. Pkt. 25c; 1 oz. 50c; ¼ lb. 90c POSTPAID.

520—Early White Tulip. (22 days) Very early tender crisp white radish. Pkt. 15c; 1 oz. 25c; ¼ lb. 70c POSTPAID.

526—Crimson Giant. (28 days). Large bright red, mild flavor. Pkt. 15c; 1 oz. 30c; ¼ lb. 75c POSTPAID.

523—French Breakfast. (25 days). Bright scarlet with white tip. ½ to 2 in. long. Crisp, sweet flavor. Pkt. 15c; 1 oz. 30c; ¼ lb. 65c POSTPAID.

541—Icicle. (27 days). The favorite long white radish everywhere. Deliciously sweet and tender. Pkt. 15c; 1 oz. 25c; ¼ lb. 60c POSTPAID.

528—Early Scarlet Turnip. (25 days). Early maturing round bright red skin. Tender, mild flavored white flesh. Pkt. 15c; 1 oz. 25c; ¼ lb. 60c POSTPAID.

542—China Rose Winter. Long 6 in. roots. Smooth very firm flesh. Matures about 50 days. Pkt. 15c; 1 oz. 25c; ¼ lb. 70c POSTPAID.

SPINACH

One oz. sows 80 to 90 ft. Plant seed early in March or April about 1 in. deep. For fall crop plant in mid-August.

586—Hybrid F. (45 days). Large tender, delicious green leaves. Hybrid plants produce almost twice as much as ordinary varieties. Excellent for canning or cooked fresh greens. Pkt. 25c; 1 oz. 60c; ¼ lb. \$1.25 POSTPAID.

583—Bloomsdale Savoy. (42 days). Early big yielder. Large crumpled glossy leaves. Excellent for greens or canning. Pkt. 15c; 1 oz. 25c; ¼ lb. 50c POSTPAID.

CABBAGE

To raise cabbage from seed it should be planted early in April in rows and covered about ½ in. deep. When plants are 2 in. high thin to about 18 in. apart. You can then transplant the extra plants.

176—Early Jersey Wakefield. (70 days). Extra early cone shaped heads. Tender, sweet crisp leaves excellent for salads. Pkt. 15c; ½ oz. 40c; 1 oz. 75c POSTPAID.

179—Golden Acre. (65 days) Dependable, early type. Round solid heads. Disease resistant. Pkt. 15c; ½ oz. 40c; 1 oz. 70c POSTPAID.

186—Premium Late Flat Dutch. (100 days). Very large solid flat heads. Excellent for kraut. Fine for winter storing. Pkt. 15c; ½ oz. 35c; 1 oz. 60c POSTPAID.

194—Red Rock. (95 days). Decorative purple red color. Attractive in salads. Best variety for cooking. Pkt. 15c; ½ oz. 50c; 1 oz. 85c POSTPAID.

PUMPKIN

One Packet of seed plants six hills; 1 oz. 30 hills. Hills should be 9 ft. apart. Weather should be warm before planting for favorable germination.

483—Small Sugar Pie. (82 days). Thick fine grained sweet flesh. Small size 5-6 lbs. An extra good keeper. The best variety for pies. Pkt. 15c; 1 oz. 25c; 1 lb. \$1.50 POSTPAID.

489—Jack O'Lantern. (100 days). Large orange colored fine grained flesh. Perfect size for Jack O'Lanterns. Excellent for pies also. Pkt. 15c; 1 oz. 40c; 1 lb. \$2.75 POSTPAID.

486—Connecticut Field. (110 days). Widely grown in corn fields for stock feeding. Excellent for pies or canning too. Very large well ribbed, reddish color. Loads of pumpkins from just a few hills. Pkt. 15c; 1 oz. 30c; 1 lb. \$1.50 POSTPAID.

485—Kentucky Field. (115 days). Large flat type, used principally for canning. Deep yellow flesh. Pkt. 15c; 1 oz. 30c; 1 lb. \$2.00 POSTPAID.

SQUASH

1 oz. plants 30 to 40 hills. Hills should be 6 to 8 ft. apart. Do not plant until soil is warm to insure proper germination.

544—Improved Hubbard. (100 days). The best winter keeper. Excellent for baking. Rind dark bronze green, slightly warted. Fine textured, sweet flavored. Pkt. 15c; 1 oz. 25c; 1 lb. \$1.75 POSTPAID.

533—Giant Golden Straight Neck. (55 days). Deep orange colored. Thick meaty flesh. Medium sized, 18 to 20 in. long. Deep orange color warted rind. Pkt. 15c; 1 oz. 25c; 1 lb. \$1.90 POSTPAID.

561—White Bush Scallop. (56 days). Flat white skinned with light cream white flesh. Excellent flavor. Small ideal baking size. Excellent keeper. Pkt. 15c; 1 oz. 40c; 1 lb. \$2.30 POSTPAID.

558—Butternut. (90 days). The best flavored of all. Light yellow, with delicious nutty flavor. Ideal baking size 8-9 in. long. Pkt. 15c; 1 oz. 40c; 1 lb. \$2.50 POSTPAID.

551—Black Zucchini. (60 days). Should be picked when 8 or 9 in. long while still young and tender. Flesh is pale green, tender and richly aromatic. Excellent when prepared with fresh ground beef and tomato paste. Write for our free Zucchini recipes. Pkt. 25c; 1 oz. 90c POSTPAID.

BERRY'S ALFALFA BLENDS

5-YEAR BLEND ITEM NO. 5

We have carefully selected outstanding lots of Vernal and Ranger and blended them into one special lot to give you the best, in one package, of the two most widely recommended varieties of Alfalfa used in the Corn-belt area today. Sow about 10-12 lbs. per acre

In our five year blend you get winter hardy, disease resistant, high yielding seed, at a price just slightly above our other World Brand grades. There is no finer quality than our Five Year Blend. Our normal tests run 99.50% or better pure with germination as high as 94%. We believe this blend of Alfalfa will last longer than any other seed on the market today. Don't take a chance with non-hardy, disease susceptible, varieties such as DuPuits, Common and others when for practically the same price you can have the best. Our five year blend is your best assurance of consistently good yields particularly if you want to keep a stand for more than two years. Our exclusive Gro-Coated protection makes it even better. Small quantities 5 lbs. \$2.85; 10 lbs. \$5.50 Postpaid. For larger quantities see Item No. 5 on our price list.

2-YEAR BLEND ITEM NO. 2

When you want a short rotation of Alfalfa, one that is good for two years, then choose our 2 year blend. It has rapid seedling vigor so that it attains a good growth the very first year. We recommend sowing a little heavier than our hardier types and you should seed about 15-20 lbs. per acre. This is made up of the Texas, New Mexico and Arizona origins—noted for quick first year growth. Often times it is possible to use this blend for hay or pasture the first year. Many of our customers plow it under when it reaches a good height. Use a light cover crop of spring grain for best results.

Postpaid Prices: 5 lbs. \$2.50; 10 lbs. \$4.50; for larger quantity prices see Item No. 2 of our price list.

Page 8

WILT-RESISTANT ALFALFA VERNAL

Vernal is the most widely recommended variety of Alfalfa where winter hardiness is an important factor. It has shown a higher resistance to bacterial wilt than Ranger, which is an important consideration in buying Alfalfa seed. Vernal has been distinctly superior to all varieties tested in Wisconsin, Iowa and other similar areas. It shows better persistence under earlier and more frequent cuttings and has been more outstanding in grazing tests than other winter hardy varieties. There is one thing to be remembered in buying Alfalfa—choose a variety that can be plowed under when you want to plow it down—not when you have to. Our recommendation is Vernal for the following areas: Iowa, Wisconsin, Michigan, Northern Illinois, Indiana and Ohio. We offer both the Certified and World Brand Grades.

CERTIFIED VERNAL ITEM NO. 29

Certified seed is always your best buy. It is sown, grown, harvested and cleaned under state supervision. Highest purity and germination. We always recommend Certified seed when it is available in quantities at no great premium in price. Regardless of which grade you buy you can be assured of the best when it's Gro-Coated Brand. See Item No. 29 for prices.

VERNAL WORLD BRAND ITEM NO. 23

Our World Brand Vernal retains the same superior characteristics as our Certified grade. We select only the finest lots of Vernal for our World Brand quality. Mature bright plump seed, carefully selected and blended, will qualify for Berry's World Brand. It's Gro-Coated to give you even more for your money. Small quantities 5 lbs. \$3.25 10 lbs. \$6.25 Postpaid. For larger quantities see Item No. 23 on our price list.

HARDY ADAPTED ALFALFA

RANGER

Item No. 25—Western Grown
Item No. 26—Northern Grown

CERTIFIED ITEMS NO. 25 and 26

Ranger is highly recommended in practically every state where winter-hardiness and resistance to bacterial wilt are a factor. Certified seed is always your best buy. The ability of Ranger to persist for several years under adverse weather conditions insures you of hay and pasture every year at very little or no premium in seed costs. Because of this high persistence, you plow Ranger under when you want to rather than when you have to as is often the case with less hardy varieties such as Du Piuts and other common types. See **Item No. 25 and 26** on Price List.

WORLD BRAND RANGER ITEM NO. 27

There is very little actual difference in quality between our World Brand and Certified grades. The desirable characteristics that make Ranger so much superior are retained in our World Brand quality. Our buyers are very careful in selecting lots from dependable growers to be sure we get only top grade pure seed. Minimum specifications for our World Brand Ranger are 99.25% purity and 90% germination.

POSTPAID PRICES: 5 lbs. \$3.00; 10 lbs. \$5.50. See **Item No. 27** for Quantity Prices.

OTHER HARDY ALFALFAS

WORLD BRAND GRIMM TYPE

ITEM NO. 19

Grimm is still the favorite of many of our customers. It is hardy for any area and top quality seed — Gro-Coated to insure better, more vigorous stands. We recommend Grimm for short rotations, two or three years. Where longer rotations are needed, use either Vernal or Ranger. See **Item No. 19** on the Price List.

WORLD BRAND COSSACK

ITEM NO. 20

Cossack is another winter-hardy variety that has performed well in northern areas on a 2 or 3 year rotation program. World Brand Cossack is preferred by a large number of our customers, particularly in Iowa and Nebraska. Here again, we recommend using Ranger or Vernal for longer rotations. See **Item No. 20** on Price List.

WORLD BRAND NORTHERN

ITEM NO. 18

This is the same type alfalfa that was formerly sold as Dakota #12. It seems to be heavier stemmed than Cossack and Grimm and generally recovers faster after cutting. It has yielded exceptionally well during the second year of production. The wilt-resistant varieties should be used in long rotations. Available only in our unexcelled World Brand quality. See **Item No. 18** on Price List.

CUT YOUR SEEDING COSTS HONEST JOHN

Item No. 11

Hundreds of our customers who have bought Honest John for many years will sow nothing else. They like the economy and the performance of Honest John. They know they are buying dependable seed at a big savings—it generally sells for about one-third less than our best grades.

A BLEND OF HARDY ALFALFAS

We carefully blend several different types of alfalfa in Honest John. These include grimm, common, cossack and ranger. There are no non-hardy origins used. Since a larger percentage of smaller, thinner berries go into Honest John, you actually get many more seeds per pound so that you need not sow it any heavier than you would if you were using the better grades. We recommend sowing about 10 to 12 pounds per acre. The added protection of Gro-Coated Brand treatment makes Honest John a remarkable value in hardy alfalfa. Refer to **Item No. 11** on the price list. **Small Quantities Postpaid.** 2 lbs. \$1.00; 5 lbs. \$2.75; 10 lbs. \$4.00.

LOT BEAUTY RED CLOVER & ALFALFA MIXTURE

Many farmers make a practice of mixing legume seedlings. It is possible to obtain better stands and heavier yields in many cases by sowing mixtures of this type. Our Lot Beauty contains about 75% Red Clover and 25% hardy Alfalfa — an ideal combination for both hay and pasture. The Red Clover is all central states origin — hardy and well adapted for all mid-western states. If you buy alfalfa and red clover to mix in these proportions you will pay at least 15% more.

SEEDING RECOMMENDATIONS

We have found that Lot Beauty seeded at 8 to 9 lbs. per acre is sufficient to assure good healthy stands. This is possible because of the Gro-Coat protection which we use on all legume seeds. This blend is high quality seed, free of noxious weeds, and seldom contains more than a mere trace of other crop seed such as alsike or sweet clover. 5 lbs. \$2.25; 10 lbs. \$4.00 POSTPAID. See **Item No. 31** on Our Price List for Larger Lots.

BUFFALO

WILT RESISTANT

CERTIFIED—ITEM NO. 21

Buffalo is an improved selection from Kansas Common that possesses the same marked resistance against bacterial wilt as Ranger. Buffalo may not survive the severe winters of the northern states as well as Ranger and Vernal but it is superior in many cases in the production of forage and in its ability to recover faster after cutting. We recommend Buffalo for Kansas, Missouri, southern Iowa, southern half of Illinois and Indiana. There is no finer grade than our Certified seed made even better by our exclusive Gro-Coat protection. **Item No. 21** on Price List.

WORLD BRAND—ITEM NO. 22

The same high standards of quality are maintained in our World Brand Buffalo as in our Ranger described above. It possesses the same characteristics as our Certified grade and in appearance, there is no apparent difference, yet it is priced at a good savings below the Certified. 5 lbs. \$2.40; 10 lbs. \$4.50 POSTPAID. See **Item No. 27** on Price List for Larger Quantities.

RED CLOVER

KENLAND

MEDIUM
RED CLOVER

CERTIFIED—ITEM NO. 37

Kenland is a superior variety of Medium Red Clover adapted to Ohio, Indiana, Illinois, Iowa and all areas south of these states. It has shown good resistance to Southern anthracnose and has consistently outyielded common types by as much as 30% where this disease is a factor. Certified Kenland assures you of the very best in Red Clover seed at very little premium in seed cost. It is not recommended for Wisconsin, Minnesota and Michigan but in its adapted area is definitely superior to our common types of Medium Red Clover. Sow in the spring 8-9 lbs. per acre. Small Quantities: 2 lbs. \$1.40; 5 lbs. \$3.25. See price list Item No. 37 for larger quantities.

WORLD BRAND—ITEM NO. 38

The same general description applies to our World Brand as the Certified grade. We are extremely careful in selecting only lots of Kenland produced by dependable growers from genuine Kenland fields. 99.25% pure and 90% germination are our minimum specifications for World Brand quality. 5 lbs. \$2.50; 10 lbs. \$4.25 POSTPAID. For larger quantities see Item No. 38 on price list.

Be Sure to Inoculate. 1 Bu. Size 60c; 2 1/2 Bu. Size \$1.20 POSTPAID.

DOLLARD

MEDIUM
RED CLOVER

CERTIFIED—ITEM NO. 39

A new hardy variety that has shown resistance to Northern Anthracnose. It has been definitely superior in yields in Wisconsin, Minnesota and Michigan where this disease is common. Dollard has persisted into the third year more than common varieties. It blooms slightly later than other types but seems to produce a better second cutting. We offer only the Certified grade—always your best buy. Tests have shown 15% increase in yields as compared to Common Medium Red Clover in its adapted area. Sow 8-9 lbs. per acre. See Item No. 39 on our price list.

LOT JOE

MEDIUM
RED CLOVER

ITEM NO. 33—Here is a real value. Contains from 2-3% of other crop which is Alfalfa, Alsike and some Sweet Clover. Lot Joe has a good germination, 85% or better, and is nice bright clean seed from from noxious weeds. We buy this seed at a discount over our World Brand which enables us to offer this outstanding value. Sow 8-9 lbs. per acre. Gro-Coated for your assurance of better stands. 5 lbs. \$2.25; 10 lbs. \$4.00 POSTPAID. See Item No. 33 on price list for larger quantities.

MAMMOTH Red Clover

WORLD BRAND—ITEM NO. 41

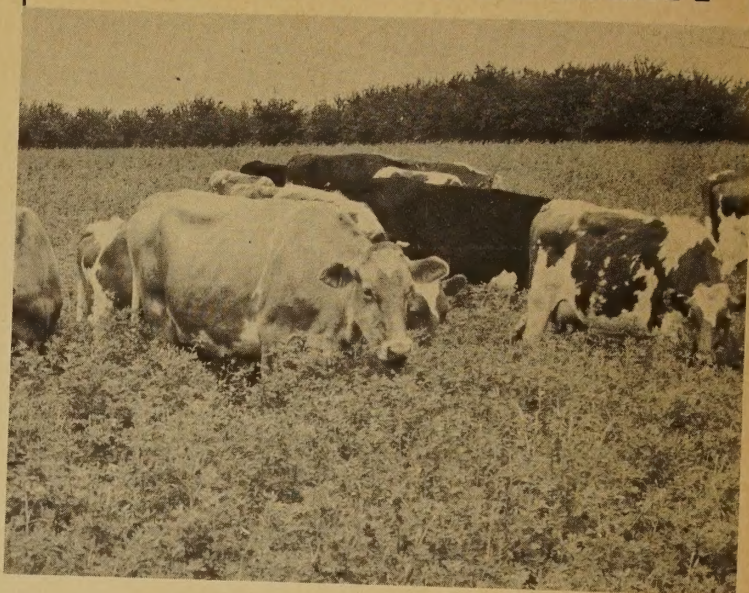

Mammoth Red Clover grows taller and heavier than the Medium types. It is sometimes referred to as one cut or sapling clover. Mammoth blooms later than other Red Clovers and while only one hay crop can be harvested yields are generally comparable to the two crop types. It is excellent for soil improvement and few legumes will build up the soil as fast as plowing under a heavy growth of Mammoth Clover. It is superior to Medium pastures because it lives longer and is probably more drought resistant. Sow about 8-9 lbs. per acre. Small quantities. 5 lbs. \$2.25; 10 lbs. \$4.00 POSTPAID. For other mammoth prices see Item No. 4.

Lot SOILBUILDER

MAMMOTH & SWEET CLOVER MIXED

ITEM NO. 43—A wonderful blend for building up soil fertility. Contains about 65% Mammoth and 35% Sweet Clover. A mixture of this type will really produce a heavy growth with the Sweet Clover growing tall and the Mammoth filling in the lower growth. Plowing under a heavy stand of Soilbuilder will do wonders for your land. Sow 12 lbs. per acre, and inoculate with Berry special live inoculation. Soilbuilder is all top grade seed both in purity and germination. For Soilbuilder prices see Item No. 43.

For HAY PASTURE SOIL IMPROVEMENT

CENTRAL STATES

MEDIUM RED CLOVER

WORLD BRAND—ITEM NO. 34

Our Central States Red Clover is well adapted for the entire Cornbelt area. It is top quality in every respect and priced to cut your seeding costs to a minimum. Red Clover is the foundation for crop rotation throughout the middlewest because it is valuable as hay, pasture, soil improvement and for cash seed crops. Our World Brand Red Clover will be a minimum of 99% pure and 90% germination. Sow only 7-8 lbs. per acre with our Gro-Coated Red Clover. Prices small quantities. 5 lbs. \$2.50; 10 lbs. \$4.50 POSTPAID. For other prices see Item No. 34.

SPECIAL BRAND RED CLOVER—ITEM NO. 32

Our lowest price Medium Red Clover. Not so fancy in appearance but a good serviceable lot of seed priced below our World Brand grades. Generally runs about 12-15% below our best grade in germination but because of the smaller size seed you can sow at the same rate of 7-8 lbs. per acre. 5 lbs. \$2.25; 10 lbs. \$4.00 POSTPAID. Larger quantities quoted on price list Item No. 32.

IDAHO WORLD BRAND

ITEM NO. 35—Idaho seed is always more brilliantly colored and the berries are perhaps slightly larger which assures you of excellent quality. Many believe it to be more hardy than the Central States origin. We recommend sowing Idaho seed 8-9 lbs. per acre. 5 lbs. \$2.50; 10 lbs. \$4.25 POSTPAID. For other prices see Item No. 35.

BIRDSFOOT TREFOIL

CERTIFIED EMPIRE

ITEM NO. 66—Empire Trefoil has consistently proven superior to imported types. Trefoil has the ability to establish itself under unfavorable soil conditions and seems to produce well in many soil types where Alfalfa and other legumes fail to grow. The feeding value of Trefoil is very high and in many tests was found to be far superior to Alfalfa and other legume-grass combinations in beef production.

Trefoil should be seeded in the spring on a well prepared, firm seed bed. Never cover over 1/4-1/2 inch deep. We recommend sowing 3-8 lbs. per acre depending on the purpose for which it is to be used. Small quantities 1 lb. \$1.25; 5 lbs. \$5.50; 10 lbs. \$10.00 POSTPAID. Other quotations on price list Item No. 66.

BE SURE TO INOCULATE HEAVILY

LADINO CLOVER

CERTIFIED—ITEM NO. 63

Ladino is similar in appearance to the common white pasture clover but grows from two to four times as large. It is easy to grow, widely adapted and very productive. We recommend using with grasses such as Orchard, Bromo or Fescues sowing about 1/2 lb. Ladino per acre in such combinations. The seed is very small which accounts for the low seeding rate. Ladino, in addition to having a tremendous carrying capacity for livestock, also provides an excellent green pasture for poultry. Be sure to sow plenty of grasses with Ladino to reduce the danger of bloating when pastured. 1 lb. \$1.10; 5 lbs. \$5.00; 10 lbs. \$9.00 POSTPAID. For larger quantities see Item No. 63.

GRASSES

Most farmers are well aware that productive pasture land is essential in order to profitably produce livestock. They know, too, that grasses are a necessary part of good conservation practices and profitable farm management. Good pastures provide the most economical type of feed for all livestock. Properly managed grassland farming will result in low cost agricultural production. There are grasses available for every farm need and at Berry's the selection is large and varied with prices always right.

BROME GRASS

LINCOLN BROME—ITEM NO. 139

Lincoln Brome is widely adapted and under proper management will produce profitable seed crops. It is tall and leafy and makes ideal pasture when used alone, with legumes or other grasses. This past summer was not a good year for seed production and prices are considerably higher than a year ago. Our cleaning and processing facilities enable us to offer quality Lincoln Brome at real savings.

5 lbs. \$3.00; 10 lbs. \$5.50 POSTPAID. See Item No. 128 on Price List.

CHOICE BRAND BROME—ITEM NO. 138

The same strain and same characteristics as the brome described above but 5-9% lower in germination. A good serviceable lot of brome that will produce a good crop at real savings to you.

Small quantities. 5 lbs. \$2.50; 10 lbs. \$4.50; postpaid. See price list for larger quantities.

TALL FESCUES

Tall Fescue is primarily a pasture and soil conserving grass. It is a deep-rooted, long-lived variety with dark shiny leaves. The maximum height of a mature plant is about three feet. It is widely adapted and seems to flourish in poorly drained areas as well as those with small amounts of moisture. There are two types of tall fescue, both very similar in appearance; Alta and Kentucky 31. Seed can be sown in spring or fall. When seeded alone, use 10-12 lbs. per acre. Use about 5 lbs. per acre in combination with other grasses and legumes. Combinations of Ladino, Fescue, and Alfalfa are commonly used with good results.

KENTUCKY 31 FESCUE—ITEM NO. 147

Many of our customers prefer the Kentucky 31 strain because they feel it is more hardy than Alta. Kentucky 31 originated on a farm in Kentucky where it had grown for many years from the original plants.

5 lbs. \$2.25; 10 lbs. \$4.25 POSTPAID. See Item No. 147.

ALTA FESCUE—ITEM NO. 149

Most of the Alta Fescue is produced in Oregon where it originated. Alta is probably grown more extensively than Kentucky 31 although most experts agree there is little if any significant difference between the two strains.

5 lbs. \$2.50; 10 lbs. \$4.50 POSTPAID. See Item No. 149.

TIMOTHY

Timothy was first propagated in this country as early as 1747. It is perhaps the easiest grass to raise yet one of the most popular and important.

Timothy is widely adapted and is grown for both hay and pasture. One of the most widely used seedings for hay is that of Red Clover and Timothy. We recommend seeding about 4-5 lbs. of Timothy with 7-8 lbs. of Red Clover per acre. Timothy may be seeded both spring and fall. It is still the most economical grass to sow.

NEW CLIMAX TIMOTHY

This is one of the newest strains of Timothy developed in Canada. It is extremely hardy and seems to produce more leaves than the common strains. It yields well in both forage and seed, and recovers well after cutting. SMALL QUANTITIES POSTPAID. 2 lbs. \$1.00; 5 lbs. \$2.00; 10 lbs. \$3.75. See Item No. 76 for larger quantities.

WORLD BRAND TIMOTHY—ITEM NO. 79

Our finest quality of common Timothy. Beautiful bright seed which generally runs at least 99.50% pure. Gro-Coated to insure better stands.

DEALERS FANCY GRADE—ITEM NO. 78

A very serviceable clean grade of seed but may contain a small percentage of Alsike. Does not run quite as high in germination as the World Brand.

ORCHARD GRASS

ITEM NO. 142—Orchard Grass starts growing very early in the spring and develops rapidly, maturing for hay or seed earlier than Brome or Timothy. It recovers rapidly after grazing or mowing and produces an abundance of forage throughout the growing season. More and more farmers are sowing Orchard Grass every year as they realize the value, both as a meadow and hay crop. It will grow during the drier, warmer part of the summer, making it more desirable in this respect than Timothy and Brome Grass. It is widely adapted, being grown in practically every state and in some areas in Southern Canada.

SEEDING RECOMMENDATIONS

Early spring seems to be the best time for sowing Orchard Grass. Late summer or early fall seedings are satisfactory for states of Missouri, Southern Illinois, Indiana, and similar areas. North of these areas, spring seeding is recommended. When seeded alone, use 10-12 lbs. per acre. With Ladino, use 6-8 lbs. with 1 lb. Ladino. With other grasses, use 5-6 lbs. Orchard Grass.

5 lbs. \$2.75; 10 lbs. \$5.00 POSTPAID. See Item No. 142 on Price List.

NEW S-37 ORCHARD GRASS

ITEM NO. 141—A new variety available this year in quantity for the first time. Leafier growth and very palatable. Small quantities postpaid.

5 lbs. \$3.00; 10 lbs. \$5.25. See Item No. 141 for larger quantities.

REEDS CANARY GRASS

ITEM NO. 141. The habitat of Reed Canary Grass is poorly drained, wet areas but it is also one of the most drought-tolerant grasses on well-drained upland areas. Well established stands will supply abundant pasture and it is readily eaten by most livestock, particularly beef cattle. It starts growing very early in the spring and if not pastured heavily, will grow to a height of 4-5 feet at maturity. Reed Canary Grass is slow to get started from seed and the recommended procedure is to sow a small area, about 1/2 acre, as a nursery, using about 12 lbs. per acre. When this small area is started good, cut sod pieces to be used in gully, ditch bottoms, and other hard to seed areas. It develops faster in this manner. Write for our free circular.

PRICES: 1 lb. 90c; 5 lbs. \$4.00; 10 lbs. \$7.75 POSTPAID. See Item No. 141 on Price List.

RED TOP

A widely adapted grass that will grow on soils so poor in fertility that other grasses fail. It is particularly adapted to wet low areas and is valuable for seeding waterways, drainage ditches, and eroded areas. We recommend using with other grasses and legumes on low wet land. Red Top is also a suitable lawn grass when used with Blue Grass and other adapted grasses. In pasture mixtures, sow 3-5 lbs. If seeded alone, 8-10 lbs. per acre.

PRICES: 1 lb. 90c; 5 lbs. \$4.00; 10 lbs. \$7.50 POSTPAID. See Item No. 127 on Price List.

PERENNIAL RYE GRASS

ITEM NO. 129 — A fast growing short-lived perennial. Used widely for cover crops and in pasture mixtures. It grows faster than Brome and Timothy but after the second year, begins to thin out rapidly. Plants grow about 2 feet tall at maturity. Sow 20 lbs. per acre alone or 8 to 10 lbs. with other grasses.

PRICES: 3 lbs. \$1.35; 5 lbs. \$2.25; 10 lbs. \$4.25 POSTPAID. See Item No. 129 on Price List.

DOMESTIC RYE GRASS

ITEM NO. 128—This annual type rye grass is rapidly increasing in importance as a forage and soil improvement crop. It is primarily used as a fast growing temporary pasture but is also widely used in lawn mixture as a nurse crop. It is very economical and can be used generously on any area where a quick cover is needed. We recommend spring sowing in northern areas and fall or spring in the south. PRICES: 3 lbs. \$1.05; 5 lbs. \$1.65; 10 lbs. \$3.00 POSTPAID. See Item No. 128 on Price List.

Sweet CLOVERS

Sweet Clover thrives under a wide range of soil and climatic conditions. It will not grow well on acid soils but seems to thrive on most all the other soil types. It has large deeply penetrating roots which are valuable in storing nitrogen and for "loosening up" hard compact soils. Sweet Clover has no equal as a soil improving crop. Most Sweet Clover strains are biennial or two year crops and the second year growth is normally plowed down as a green manure crop in the spring. The most common strains of Sweet Clover are the Yellow Blossom, which is somewhat finer stemmed and the White Blossom, or tall type, which is later and grows somewhat taller than the yellow. Both types are grown widely in the corn-belt region. Seeding rates vary from 12-15 lbs. per acre. **Inoculate all clovers.**

YELLOW BLOSSOM, WORLD BRAND

Yellow Blossom is probably more tolerant to adverse weather conditions than the White Blossom. It normally matures about 3 weeks earlier and seems to be more dependable in the production of seed. Our World Brand quality is the finest available. Sow in the spring 12-15 lbs. per acre. Small lots: 5 lbs. \$1.50; 10 lbs. \$2.75; POSTPAID. See Item No. 86 for Larger Quantities.

ITEM
NO. 86

TALL TYPE, MOSTLY WHITE BLOSSOM

Probably more widely used than the yellow and is preferred by many because it provides pasture later during the second year of growth. In a Nebraska test, Yellow provided 187 steer days of pasture compared with 224 for White Blossom during the second year. Both types appear equal for soil improvement. Prices: 5 lbs. \$1.50; 10 lbs. \$2.50 POSTPAID. Quantity Prices Item No. 83 on Price List.

ITEM
NO. 83

SPECIAL MIXED SWEETCLOVER

Mixed Sweet Clover is just as good as either of the above types for soil improvement. Our mixed lots generally are predominately yellow. The germination may run a few points below our better grades. Sow 12-15 lbs. per acre. See Item No. 78 on Price List.

ITEM
NO. 78

ALSIKE CLOVER

Alsike grows well on many soils but seems to be better on heavy wet types. It is somewhat tolerant to an acid soil condition. Alsike should be sown in the spring at about 5 to 7 lbs. per acre if used alone. Many prefer to mix Alsike with Timothy and Red Clover in which case you should use 2-3 lbs. of Alsike. The inclusion of Timothy is desirable since Alsike is weak-stemmed and is inclined to lodge. The Timothy also is beneficial in curing for hay. Alsike will many times produce heavy hay crops on low land where Alfalfa and Red Clover fail. The feeding value is high and compares favorably with Red Clover. It is one of the most economical seedings.

WORLD BRAND ALSIKE—ITEM NO. 54

Our World Brand grade is our top quality-beautiful dark green, plump seeds. Very high in germination and free from noxious weeds.

PRICES. 5 lbs. \$2.50; 10 lbs. \$4.50 POSTPAID. For Larger Quantities See Item No. 54 on our Price List.

UNIVERSAL BRAND ALSIKE—ITEM NO. 52

This grade is nice new crop seed but generally contains about 2 or 3% of other crop seed like White Clover, Timothy, or maybe just a trace of Sweet Clover. Germination is high.

PRICES. 5 lbs. \$2.25; 10 lbs. \$4.00 POSTPAID. See Item No. 52 on Price List.

WINTER OR HAIRY VETCH

Hairy Vetch can be grown in almost any section of the country. It is winter hardy and seems especially well-adapted to sandy soils. Vetch is used extensively as a cover crop and for soil improvement. Because of its vining tendencies, it is difficult to cut but it is palatable as both hay and pasture. Hairy Vetch should be seeded in the fall at about 30 lbs. per acre. It can be broadcast or drilled and should be covered only sufficiently to insure moisture to cause germination. Be sure to inoculate.

PRICES: 5 lbs. \$2.00; 10 lbs. \$3.50 POSTPAID.

For Larger Quantities, See Item No. 68.

LOT DO MORE SWEET CLOVER

Do More is our lowest priced Sweet Clover and a real value at our low, low price. Naturally, it is not the bright large seed like our World Brand grades but many of our customers use nothing else. Actually, the smaller seeds make up for the difference in germination since you get about 20% more seeds per pound. Lot Do More is mixed but the White Blossom is pre-dominate. Sow 12-15 lbs. per acre. See Item No. 80 on our Price List.

ITEM
NO. 80

MADRID

ITEM
NO. 90

A relatively new strain of Yellow Blossom that seems to be superior to the regular Yellow Blossom in several ways. It grows faster after seeding and has stronger seedling vigor which is beneficial in establishing heavy producing stands. The foliage during the first year growth is less susceptible to frost injury than other strains which permits later pasturing. The second year growth is leafier and more productive and is several days later. Madrid is also a dependable seed producer. Prices are only slightly higher than our other World Brand varieties. POSTPAID PRICES: 5 lbs. \$1.50; 10 lbs. \$2.50. See Item No. 90 on our Price List for Larger Quantities.

BERRY'S INOCULATION

Our own special culture formulated exclusively for Gro-Coated seed. Guaranteed to contain more live bacteria. Easy to use—apply dry, no mixing necessary. For Alfalfa, Red Clover, Sweet Clover, and Alsike.

1 Bu. Size 60¢; 2½ Bu. Size \$1.20 POSTPAID.

LESPEDeza

KOREAN TYPES

The Korean types of Lespedeza are most useful for hay and pasture. The area of adaptation is somewhat limited. We do not recommend sowing Lespedeza further north than central Iowa, Illinois, and Indiana. It is grown extensively in Oklahoma and Kansas, across Missouri and eastward to the coastal states. Lespedeza is quite profitable as a cash seed crop. It will stand close grazing and at the same time, reseed abundantly.

The seed generally does not mature until after heavy frosts in the fall. The feeding value of Lespedeza is very high and it is successfully raised on thin unproductive soils. It is highly advisable to inoculate original seedings of Lespedeza for best results.

EARLY STRAIN 19604

ITEM NO. 75—The early strain will probably grow and mature farther north than the regular. It also grows somewhat taller. 19604 is hulled and scarified to assure faster germination; Gro-Coated to assure better, more vigorous stands. 5 lbs. \$1.75; 10 lbs. \$3.00 POSTPAID. See Price List for Larger Quantities.

REGULAR KOREAN SCARIFIED

ITEM NO. 72—Regular Korean is recommended for areas similar in latitude to southern Iowa and on south. The regular types mature a little faster than the 19604 type. Makes an excellent summer pasture high in nutritive value. Scarified seed goes ½ further than the unhulled and will germinate faster. Sow in the spring about 15 lbs. per acre.

5 lbs. \$1.75; 10 lbs. \$3.00 POSTPAID.

UNHULLED KOREAN

ITEM No. 70—The unhulled seed is slower in germination but in its adapted area will produce just as good results as the scarified. Sow about 30 lbs. per acre very early in the spring. See Item No. 70 on Our Price List.

CLOVER & GRASS MIXTURES

5-WAY MIXTURE

ITEM NO. 100

Here is an ideal combination of legumes and Timothy containing just the right amount of each for maximum production and feeding value. It contains 65% legumes consisting of 23% Alfalfa, 20% Alsike, 20% Red Clover, and 2% Ladino, all hardy, high grade seed. The balance of the mixture is carefully selected Iowa and Missouri grown Timothy. Our 5 Way contains no Sweet Clover. If you were to buy straight lots of seed for mixing into a blend of this kind, you would pay 15 to 20% more. We occasionally are offered mixed lots of seed from western growers at a good discount. We add enough of the necessary straight lots to conform to the above specifications. That is the reason we can offer this mixture at such an attractive price. We recommend sowing 9-10 pounds per acre.

Postpaid Prices: 5 lbs. \$2.75; 10 lbs. \$5.00. For larger quantities, see Item No. 100 on our price list.

MARVELOUS MIX ITEM NO. 95

75% LEGUMES — 25% TIMOTHY

Our heaviest producing and largest selling mixture. Can be used for hay, pasture, or plowing under. Contains about 25% Alsike, 15% Alfalfa, 25% Sweet Clover, 10% Red Clover, and a small amount of Ladino with the balance, Timothy. Only hardy, carefully re-cleaned seed goes into our marvelous mixture. This seeding should last several years and under normal conditions, should grow well on just about any type soil. We recommend sowing about 10-12 pounds per acre, which will average about 80 seeds per square foot. You will be amazed at the tall dense growth you can get from this combination. Marvelous Mixture is a real soil builder, too. The Sweet Clover opens up the soil. The Alfalfa, Red Clover, and Alsike store nitrogen in the soil. The Ladino fills in the lower growth. It is Gro-Coated to give you added protection and better assurance of vigorous, heavy stands.

BASIC NO. 1 ITEM NO. 107

An all purpose seeding that will last for several years. Basic No. 1 is predominately grasses but contains 25% hardy Alfalfa and 5% Ladino, just the right amount of legumes to make a perfectly balanced mixture. The grasses have been selected to give maximum production during the entire growing season. These grasses are Brome, Tall Fescue, Orchard Grass, and Timothy. Orchard Grass starts very early in the spring and then continues until frost. Tall Fescue reaches its maximum growth by midsummer. Timothy and Brome provide pasture practically entire season. We recommend sowing 16 to 20 pounds per acre and it can be seeded in the spring or early fall. Basic No. 1 is adapted to most any area and by adding a little Alsike and Reed Canary grass, it should do well on low, poorly drained areas.

Postpaid Prices: 5 lbs. \$2.75; 10 lbs. \$5.00. For larger quantities, see Item No. 107 on our price list.

CROPS FOR QUICK GROWTH

GREENLEAF SUDAN GRASS

ITEM NO. 228

An outstanding new release that is leafier and has decidedly more plant vigor than other varieties. The many dark green leaves are succulent and sweet tasting to livestock; yet, Greenleaf Sudan has a low hydrocyanic content which means less danger of prussic acid poisoning. It matures somewhat later than most varieties which makes it a more desirable crop for late summer pasture. Greenleaf has good resistance to leaf diseases which can be an important factor in many areas. In cultivated rows, we recommend 10 pounds per acre; if broadcast, 20-30 pounds per acre. Do not plant until after the soil becomes warm in the spring.

Postpaid Prices: 5 lbs. \$1.75; 10 lbs. \$3.25. For larger quantities, on our price list. see Item No. 288 and 289

PIPER SUDAN ITEM NO. 229

Piper was developed in Wisconsin a few years ago and many prefer it because it stays green longer than most other varieties. It is disease resistant and is low in glycoside content which makes it less dangerous with respect to prussic acid poisoning. Piper is not as sweet in flavor as Sweet Sudan but livestock eat it readily. It has a tremendous carrying capacity and will stand heavy grazing. One very important feature is its remarkable adaptation to cool climate. Highly recommended for northern Iowa, Wisconsin, Michigan, and northern Illinois, and Indiana. Sow when soil is warm in spring. 10 pounds per acre in rows of 20-30 pounds per acre if broadcast.

Postpaid Prices: 5 lbs. \$1.75; 10 lbs. \$3.25. For larger quantities, on our price list. see Item No. 229 and 230

SWEET SUDAN ITEM NO. 231

A very popular type Sudan grass in Iowa, Missouri, and Illinois. It has a very sweet flavor to livestock and as a result, dairy cattle eat it readily. It is considerably higher in glycoside content and should not be pastured during extreme drought periods or after heavy frosts. It stools freely and will produce heavy dense forage. Seeding recommendations are the same as Piper.

Postpaid Prices: 5 lbs. \$1.65; 10 lbs. \$3.00. For larger quantities, see Item No. 231 on our price list.

MILLETS

GOLDEN OR GERMAN

ITEM NO. 225

A heavy growing type of foxtail millet valuable as an emergency catch crop. Golden Millet makes a quality of hay comparable to Timothy and it seems to be relished by livestock. Grain from Golden Millet is palatable and has 83% the feeding value of corn. Millet is a warm weather crop and generally should be seeded two to four weeks after corn. Sow 30 or more pounds per acre with an ordinary grain drill. Cut for hay just before the first heads appear. Harvest for grain when the seed in the upper half of the heads are mature.

Postpaid Prices: 5 lbs. \$1.50; 10 lbs. \$2.50. For larger quantities, see Item 225.

PROSO MILLET

ITEM NO. 229

Proso is more palatable as a grain than the foxtail type millets. It is readily eaten by all livestock and when ground, has the same feeding value as barley and corn. Proso differs from Golden in that it has an open panicle type head. Used principally for grain. Seeding and harvesting recommendations are the same as for Golden described above.

Postpaid Prices: 5 lbs. \$1.50; 10 lbs. \$2.50. For larger quantities, see Item No. 227 on our price list.

BILLION DOLLAR GRASS

(JAPANESE MILLET)

ITEM NO. 232

A phenomenal yielder of grain or green feed. Seeding recommendations same as German Millet above. Use for emergency hay crop. Matures in 6 to 8 weeks. Excellent feed for migratory waterfowl.

Postpaid Prices: 5 lbs. \$1.50; 10 lbs. \$2.50. For larger quantities, see Item 232 on price list.

HYBRID Sorghums

Hybrid Sorghums are increasing in popularity every year. Increased yields, rapid growth, tolerance to dry conditions, resistance to insects and disease, and faster maturity are just a few of the most important advantages of hybrid sorghums over the old types. Even though we may offer Certified seed it is possible that you may occasionally see an off-type plant and we assume no responsibility or liability for the presence of such plants in your field.

GM BRAND 333 VERY EARLY

Our very earliest variety and one that can be grown in the Dakotas, Northern Iowa, and N. E. Nebraska. Should mature 10 days or more earlier than our other varieties. Heavy yielding with loose spreading head which is conducive to faster drying. Not Certified. POSTPAID prices 5 lbs. \$1.50; 10 lbs. \$2.50. See Item No. 243 for other prices.

GM BRAND 444 EARLY

Matures about the same time as Redbine 60 and about 1 week earlier than 666. Excellent yielder and just right for combining. Grain is a very light red color. For Central Iowa and similar areas. Use about 10-12 lbs. per acre in areas of average moisture and 6-8 in more arid regions. POSTPAID prices: 5 lbs. \$1.50; 10 lbs. \$2.50. See Item No. 240 for larger quantities.

GM BRAND 666

Item No. 241—Matures about the same time as Martin Milo. We believe our 666 Brand will outyield all the other grain sorghums in this class. We recommend it for Southern Iowa, Central Illinois and similar areas. It is a very popular number in Southern Nebraska and Kansas. Should outyield Martin Milo by 50% under favorable conditions. Has the characteristic open type head of all Hybrid Sorghum. POSTPAID prices: 5 lbs. \$1.50; 10 lbs. \$2.50. See Item No. 241 for other prices.

ATLAS SORGO

A highly drought resistant crop that we might term as being a sweet stalk grain sorghum. Produces tremendous yields of fodder. In dry seasons it has out-produced corn and grain yields 3 to 1. Juice from the sorgo is very sweet. It is palatable nutritious feed. Corn if injured by drought will stop growing, but Atlas on the other hand will start up again. It has good resistance against lodging. Plant 8 to 12 pounds per acre at corn planting time or after, in rows 40 inches apart. Often cut before frost and shocked to cure. Item No. 220 on our price list. Smayy amounts, postpaid. 2 lbs. 80c; 5 lbs. \$1.25; 10 lbs. \$2.10. See Item No. 241 for other prices.

REDBINE 60 MILO

Item No. 222—A short season drought resistant grain crop. The feeding value of Redbine 60 is comparable to corn. It will yield about the same as corn on comparable land and under similar conditions. Average height 3 to 3½ ft. It is red-seeded and combines easily. We recommend Redbine 60 as a wonderful grain crop in areas where rainfall is normally short. Planting rates vary from 6-12 lbs. Redbine 60 should bloom about 60 days after planting. Small quantities POSTPAID: 5 lbs. \$1.40; 10 lbs. \$2.30. For larger quantities see Item No. 222 on price list.

NORKAN ITEM NO. 221

Sometimes referred to as early Atlas because it resembles it so closely but matures about 2 weeks earlier. Can be grown farther north than Atlas but doesn't produce quite the tonnage. Drought resistant and good for ensilage or grain. Should mature in about 105 days and generally reaches a height of about 6 feet. It is a selection from a cross of Atlas and Early Sumac. Plant about 8 lbs. per acre generally about a week after corn is planted. Responds well to fertilization. POSTPAID prices: 5 lbs. \$1.40; 10 lbs. \$2.30. See Item No. 221 for other prices.

HEGARI ITEM NO. 217

A grain sorghum that grows to a height of about 4½ ft. but may vary with soil conditions and growing season. Matures in about 110 days. Produces high yields of grains with heads 7 to 8 inches long and 3 inches in diameter. Fine for ensilage or fodder and is drought resistant. The grain is distinguished from other sorghums by the white color with brown spots. Planting recommendations similar to Norkan described above. Sometimes cured and shocked for winter feed. POSTPAID. Prices: 5 lbs. \$1.30; 10 lbs. \$2.20. Quantity prices Item No. 217.

NORGHUM ITEM NO. 219

Developed by South Dakota and consequently is a very early type. Should grow about 4 ft. high which makes it ideal for combining. Can be planted farther north than most of the other grain sorghums. Should mature satisfactorily in Northern Iowa or south and similar areas. Where later varieties fully mature they can be expected to outyield Norghum. Small quantities POSTPAID: 5 lbs. \$1.30; 10 lbs. \$2.20. For larger quantities see Item No. 219.

DWARF ESSEX RAPE

ITEM NO. 233

Rape is an outstanding emergency pasture crop. Comparative tests show that it compares favorably with Alfalfa in producing rapid and economical gains with hogs. Hogs pastured on Rape have an unusually thrifty appearance. Rape is also a desirable pasture for sheep. A combination of oats and rape makes an excellent pasture for ewes and lambs. A well worked, clean seedbed is best for Rape, sowing 5-6 lbs. per acre in spring or as late as midsummer. If broadcast use about 8 lbs. per acre. Plants should not be pastured shorter than 4 inches. In the fall it may be stocked to its limit. Small quantities POSTPAID: 5 lbs. \$1.75; 10 lbs. \$2.90. For larger amounts see Item No. 233.

PORK PRODUCER ITEM NO. 234

A mixture of legumes, forages and grains containing Vetch, Rape, Rye, Barley, Oats and Wheat. Sow 50 to 60 lbs. per acre early in the spring. Should provide pasture within a few weeks. Good for emergency summer pasture. See Item No. 234.

NO HUNTING- NO TRESPASSING SIGNS

Post your farm with permanent 28 gauge steel, baked enamel signs. 4x16 inches. Red background with white letters. Your choice of NO HUNTING WITHOUT PERMISSION or NO TRESPASSING. Each 49c; 6 for \$2.39; 12 for \$4.50 POSTPAID.

BATTERY CARRIER

Handy and safe way to remove or carry batteries. Works on 6 or 12 volt types. Molded metal handle—strong reinforced rubber and plastic strap with heavy gauge metal holders on both ends. 69c each POSTPAID.

HYBRID CORN

**BEST IN THE BAG
BEST IN THE FIELD
BEST IN THE CRIB**

There are many different kinds of Hybrid Corn offered to farmers today. Most of them are good and some are not so good. Here at Berry's we believe we have the very best in pedigrees, production and grading. We know we have one big advantage that the rest of the corn companies do not have and that is our exclusive Gro-Coat protection that you get with every bushel of Berry's Hybrids. It assures you of better seedling vigor and faster germination—so essential to strong healthy plants.

BERRY'S EARLY HYBRIDS

BERRY'S 492

A new early number, far superior we think to any we have previously offered. Medium height stock and extra large ears for an early hybrid. For Northeast Nebraska, Northern Iowa and Illinois or any area south of there where an early hybrid is needed. Flats **\$12.30** bu. Rounds **\$9.30** bu.

BERRY'S 401

A good early maturing hybrid in about the 100 day class. Has good sized ears and exceptionally deep kernels for an early corn. Stands well for mechanical picking. Flats **\$12.30** bu. Rounds **\$9.30** bu.

BERRY'S 525

One of our old standbys that has been consistently good year after year under all growing conditions. A dependable, proven number that is in the 105-108 day class. Flats **\$11.90** bu. Rounds **\$8.90** bu.

BERRY'S MEDIUM MATURING HYBRIDS

BERRY'S 618

Our largest selling number in the medium maturing class. We will put it up against any other hybrid of comparable maturity. You will find very little 618 on the ground at harvest time. A rugged, dependable number. 108-110 days. Flats **\$11.90** bu. Rounds **\$8.90** bu.

BERRY'S 615B

One of the oldest and best numbers in our line. Was formerly sold as 615. Large ears, deep kernels that have a reddish tinge. A wonderful feeding corn and when it comes time to shell it will beat them all! 108-112 days. Flats **\$11.90** bu. Rounds **\$8.90** bu.

BERRY'S FULL SEASON HYBRIDS

BERRY'S 813

Our old standby full season hybrid for many years. Grown extensively in southern Iowa, Kansas, Missouri, Illinois and everywhere that uses a full season number. Inbreds are selected to give you a longer pollinating period so necessary for well filled ears in a full season corn. You'll like 813. Flats **\$11.40** bu. Rounds **\$8.40** bu.

BERRY'S 821

Our newest full season corn. 821 has shown up exceptionally good in its area of adaptation and we have many enthusiastic reports from growers on this one. Larger ears than 813 and stands up well for picking. A really rugged hybrid that will produce even under adverse weather conditions. Flats **\$11.40** bu. Rounds **\$8.40** bu.

SPRING GRAINS

MINHAFER OATS

Minhafer was available in quantity last year for the first time. They were everything we expected — high yielding, good test weight, and resistant to stem rust. It is a widely adapted variety that is on the recommended list in almost every oat producing state. Minhafer is early, has good straw strength and its resistance to stem rust is a consideration of great importance. If you have not yet tried Minhafer we strongly advise getting a start of them this year. Certified only. Not Blue Seal processed. See **Item No. 163** on our price list.

IT PAYS TO SOW CLEAN PURE SEED OATS

The investment you make in raising a crop of oats without considering seed costs amounts to a great deal of money. Labor costs, gas, machinery, depreciation and all of the other items that go into the preparation of the seedbed. Protect your investment with Berry's **EXTRA QUALITY** seed oats. Use our proven recommended varieties and dependable seed. It will pay big dividends in bigger yields over "bin run" seed of questionable quality and germination.

CHEROKEE

High yielding, dependable, re-select strain. More uniform height and higher varietal purity than the original Cherokee. Large, plump, pink-ivory kernels. Heavy test weight and fine for feeding. Has tolerance to race 45 crown rust. Our **"EXTRA QUALITY"** seed oats are an unsurpassed value. See **Item No. 170**.

NEMAHA

Our Nemaha seed oats are also a reselection from the original D69 X Bond Cross. It is one of the very best early varieties. Very similar in appearance and growth characteristic to Cherokee. Nemaha has a plump kernel. Extra fine feeding oats. The straw is medium height and stands very well. We recommend Nemaha highly for the entire spring oat producing area. See **Item No. 168** on our price list.

KINDRED BARLEY

Kindred is a 6 rowed, rough awned, early maturing variety. A wonderful feeding barley and is acceptable also as a malting variety. Kindred is widely recommended and has been consistently superior in yields for several years. Resistant to stem rust, spot blotch and net blotch. Barley makes a fine nurse crop for grass and clover seedings and the feeding value of the grain is better than oats or wheat. We recommend Kindred for Illinois, Iowa, Minnesota, Wisconsin, North and South Dakota and Northern Indiana. See **Item No. 191** on our price list.

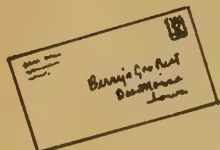

TRAILL BARLEY—NEW

Trall is a newer variety that is equal to Kindred for malting purposes but has shown a higher yielding capacity. The kernels are slightly smaller than Kindred. It has moderately stiff straw, is medium in height and resistant to stem rust. Trall was developed in North Dakota and we recommend it for the entire spring Barley producing area. For prices see **Item No. 192** on our price list.

HENRY SPRING WHEAT

A bearded, hard red spring wheat, midseason in maturity and resistant to hessian fly, mildew and loose smut. Henry is the highest yielding spring wheat we know of but it has only fair milling and baking qualities. It is used primarily as a feeding variety. The straw is medium tall, fairly stiff and the grain does not easily shatter. Henry was developed in Wisconsin and we feel it is recommended more for northern Iowa, Minnesota, Wisconsin and similar areas. Where winter wheat can be grown it will yield better than the spring varieties and is better for milling purposes. For prices see **Item No. 199** on our price list.

IT'S • EASY
• ECONOMICAL
• CONVENIENT

TO ORDER BY MAIL

Let one order from Berry's take care of all of your requirements; fruit trees, rose bushes, shrubs, bulbs, garden seed, farm seed, and plants. When you buy from Berry's you get the extra advantage of sixty years of experience in all phases of the seed and nursery business. We have specialists in every department who are willing and eager to help you with any of your planting problems. Our thousands of satisfied customers have learned to expect the extra quality, prompt service and extra savings they get with every single order. **WHEN YOU BUY FROM BERRY'S YOU NOT ONLY EXPECT THE BEST BUT YOU GET THE BEST.**

SPECIAL SERVICE ON FARM SEED ORDERS

If you live within the outlined areas of the map in the right hand column we will try to deliver your farm seed order to your nearest town in our own trucks, provided it amounts to 300 lbs. or more. We must have your order before March 1st to give you this extra service. **BE SURE TO TELL US YOUR NEAREST TOWN AND THE NAME OF SOME BUSINESS WHERE WE CAN DELIVER YOUR ORDER.** Our drivers are all instructed to notify you by mail when such a delivery is made. Where it is not practical to deliver by truck we will ship all orders of 300 lbs. or more by **PREPAID FREIGHT** to your nearest station. On all orders of less than 300 lbs. **you may deduct \$1.25 per cwt. for freight allowances** and your order will be shipped collect. If you live outside the outlined area **you may deduct \$1.25 per cwt. for freight allowance** as we cannot prepaid beyond these areas.

COMMERCIAL TRUCK LINE SHIPMENTS

If there is a commercial truckline with a terminal in your nearest town, please advise us the name of that truckline in order to facilitate prompt delivery of your order. If there is no terminal it will be necessary for you to advise us a business place where we can have your order delivered. We **do not** prepay transportation charges on commercial truck shipments, but we will refund you the amount that the transportation charges would have been had shipment been made by prepaid rail freight to your nearest station. This again applies only to the areas enclosed in the circle on the map in the opposite column. If you live outside this area **you may deduct \$1.25 per hundred** from your order for freight allowance. For the most complete selection and for the best possible service, we urge you to place your farm seed orders early.

HOW TO ORDER

Here at Berry's you can order all of your requirements on only one order blank whether it be for rose bushes, fruit trees, farm seed, garden seed or any other items that we offer. If you have misplaced the order blank enclosed with this catalog any sheet of paper will do. A self-addressed envelope is also enclosed for your convenience. Be sure to include your complete name and address along with complete information as to your most convenient station for freight, truck or express shipments. Please send check or money order with your order to assure faster, more efficient service.

Once in a great while some lots of seed may be sold out and unless you mark your order "no substitution" we will ship you the nearest thing to it and refund you the difference in price if any. Where catalog numbers are specified, please include these numbers. Please do not ask us to ship C.O.D. We have no facilities for this service and the charge only increases your cost.

SALES TAX

There is no sales tax on farm seed. It is necessary, however, to collect a 2% sales tax on all other items **FROM IOWA CUSTOMERS ONLY.**

THREE SHIPPING POINTS

For faster service and lower shipping costs all farm seed orders are shipped from **Clarinda, Iowa; Streator, Illinois; and Marion, Ohio.** We will ship your order from the closest point to you. Be sure to mail all orders to Clarinda, Iowa, and also any correspondence relative to an order. Regardless of where you live, we can supply your farm seed needs with our famous Gro-Coated Brand seed and at prices that will save you money.

BERRY'S GUARANTEE

When you have received your order and have examined the seed and then decide you are not entirely satisfied return it to us collect and all costs will be promptly refunded. If you wish, you can keep the seed for 60 days and have it tested in order to satisfy yourself that the quality is everything that you expect. If at the end of that time you are not satisfied you can also return it to us at our expense and we will refund your money.

SEVEN REASONS WHY IT'S WORTH-WHILE TO ORDER FROM *Berry's*

1. All garden and flower seed, nursery stock and allied items are shipped **PREPAID**, regardless of size.
2. One combined order on **one** order blank will take care of your entire requirements. No need to order from several different sources when **BERRY's** have everything you need.
3. All nursery stock and perishable plants as well as garden and flower seeds are **GUARANTEED TO GROW**.
4. All orders are shipped at the proper planting time for your area. Only proven, tested varieties are offered.
5. New packaging techniques insure all orders arriving in excellent condition, ready for planting.
6. Easy-to-understand planting instructions are included with each and every item.
7. If you are not completely satisfied with your order return at our expense for full, prompt refund.

We take pride in shipping our customers only the finest healthy, hand selected nursery stock. Expensive specialized equipment operated by skilled technicians is used to dig our nursery stock in the fall. You get plants and trees with strong, healthy roots so necessary for vigorous, fast growth. All stock is carefully stored in uniformly cooled buildings at just the right temperature and humidity to insure live healthy stock in the spring. All of our garden, farm and flower seed is fresh, clean stock carefully checked by our experienced staff of analysts to assure you of the highest possible germination and purity. Every order, regardless of size, receives the same careful personal attention. You'll enjoy ordering from Berry's.

10 MODERN STORES TO SERVE YOU

Hundreds of our customers drive many miles to our complete farm and home stores. They have found the service, wide selections and prices more than pay for the trip. Our trained personnel are eager to help you with any planting problems. With few exceptions, every item in this catalog, plus many more, are available in each store. Berry's are always first with the newest varieties of farm and garden seed, fruit trees and decorative shrubs. Regardless of whether you buy from our stores or direct from catalog you will always get the best service, quality and price.

STORE LOCATIONS

MARION, OHIO, 420 North Main St. (A completely modern, new store is planned for early spring at the intersections of Highway 95 and Pole Lane Road just northeast of Marion).
VAN WERT, OHIO, Just west of city limits on Highway 30.
KANKAKEE, ILLINOIS, Highway 54, just north of city limits.
STREATOR, ILLINOIS, 904 East Kent St.
GALESBURG, ILLINOIS, 1153 Grand Avenue on Highways 150 and 97.
DANVILLE, ILLINOIS, 2801 North Vermillion St., Highway 1.
KOKOMO, INDIANA, On Highways 22 and 35 just 1/2 mile east of by-pass 30.
BOONE, IOWA, East on Highway 30.
CLARINDA, IOWA, 3 blocks east of business section on Highways 71 and 2.
FALLS CITY, NEBRASKA, (Ebel Seed Company) 501 W. 14th St.

FORD—New Iowa Soy Bean

Available this next season for commercial use, the Ford Soybean promises to be the best variety yet developed for Central Iowa and similar locations. It has consistently outyielded Adams and Lincoln and matures about two days earlier than Lincoln and about seven days earlier than Clark. It is medium height and the plants are strong and upright holding the pods well off the ground. We consider Ford another step forward for Soy Bean producers in reducing production costs per bushel. For best results seed should be planted when soil temperature is 65° with about 12 seeds per ft. Supplies of seed are still quite limited. Prices F.O.B. BOONE, IOWA, 2-10 bushel **\$4.35** per bu.; 10-20 bu. **\$4.25** per bu. Limit 20 bu. per customer.

HOUSE PAINT

DO IT YOURSELF

Berry's Best

BARN PAINT

**NON-CHALKING
CAN BE TINTED**

Here is a product that we believe is superior to a great majority of high quality house paints on the American market today. Although slightly lower in cost than some highly advertised brands we gladly recommend Berry's House Paint as a product that will render outstanding and satisfactory results to the user. Our house paint has been especially formulated to fit the needs of the professional painter, yet is so easy to use that anyone can apply it with the same fine results. Our paint contains a high percentage of film forming solids, and non-evaporating liquids, ground to such uniform consistency that it covers more square feet thus giving more service, satisfaction, and long lasting durability. It is made of the finest materials available. Berry's best house paint has been designed to give exceptional hiding, controlled chalking and ease of application. Available in white only. Prices. 1 gal. **\$5.28**; 5 gal. **\$26.15**; 15 gal. **\$78.00**; 30 gal. **\$155.00**. PREPAID ONLY on 15 gal. or more.

**HIGHEST QUALITY
IN AMERICA**

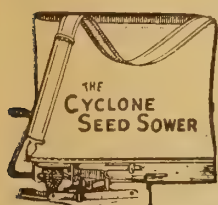

Berry's Best Barn Paint was formulated with the idea in mind of making as good a barn paint as could be purchased anywhere. It was not made to meet a price, but rather to give you a quality, long-lasting paint and the best possible value for your money. Berry's best barn paint puts a coat of weather resisting armor on the barn, fence or other buildings to which it is applied. Excellent for roofs. It is composed of the very best mineral pigments ground in linseed oil to produce a long-wearing non-fading finish. The best red oxide money can buy is used in our red and produces a brilliant bright red color that does not fade or darken. Heavy in body and will take a liberal reduction with linseed oil. One gallon on average surfaces will cover from 300 to 350 square feet with TWO COATS. Prices 1 gal. **\$3.48**; 5 gal. **\$17.15**; 15 gal. **\$51.00**; 30 gal. **\$100.00**. PREPAID ONLY on 15 gal. or more.

CYCLONE SEEDER

This has been a great favorite among hundreds of our customers for many years. It accurately distributes all smooth grass seed, clovers, grain, as well as pellet and granular fertilizer. Has an

exclusive double oscillating feed and instant control. Prevents waste of seed. Built for years of satisfactory service. Capacity 1/2 bushel. POSTPAID PRICE **\$4.95**.

SEYMOUR HEAVY DUTY SEEDKASTER.

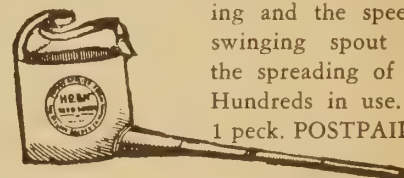

sealed in the dustproof chamber and permanently lubricated. Easy to operate. Capacity 18 quarts. POSTPAID PRICE. **\$8.25**.

Zinc grip, rust-proof steel is used in all the main parts. Body one piece drawn steel. No seams—no welts. No wood to split or warp. Gears are

HORN SEED SOWERS

The simplest of all seeders. No gears, no moving parts. Seed flows into spout which the sower swings back and forth as he walks. This seeder is adjusted by changing the size of the spout opening and the speed of the swinging spout regulates the spreading of the seed. Hundreds in use. Capacity 1 peck. POSTPAID **\$1.95**.

THE AIROSPRAYER

An efficient, economical, all-purpose sprayer for farm, lawn and home. It will spray thin liquids or heavy lotions such as whitewash and arsenate of lead. Use any kind of container such as a tin bucket. Sprays very fine mist to a steady stream 30-35 feet. Pressure up to 100 pounds. Each, **\$8.40**, Postpaid.

DOZENS OF USES

WEATHER GAUGE Educational — Fun to Watch

Accurately measures rainfall and has indicator for accumulating rainfall for any given period. Gives temperature also wind direction and speed. All gauges are accurately calibrated by national testing laboratory and are evenly mounted. Mailed in specially constructed heavy corrugated box to insure guaranteed safe delivery. POSTPAID PRICE **\$1.59**.

PORTABLE GREENHOUSE

Enables you to be as much as 6 weeks ahead of the planter using ordinary methods. Wonderful for starting potted plants and most other plants and flowers outside. Enables the sun rays to enter, but keeps out frost and cold. Will last many years. Will not crack or peel. 5 ft. length, **\$1.95**, Postpaid.

RAT BAITS THAT REALLY WORK

WARFARIN TYPE

MEAL BAITS. A ready to use meal type bait scientifically mixed with fresh high grade grain and just the right amount of Warfarin to really do the job. Proven to be most attractive to rats and other rodents. Excellent control assured when the directions are closely followed. Positive control within four to eight days when adequate supplies of fresh feed are kept at feeding stations. POSTPAID PRICES: 1 lb. **80c**; 2 lbs. **\$1.49**; 5 lbs. **\$2.85**.

PELLET TYPE BAITS. The same formulation as above, but bait is pressed in small bite-sized pellet form. Experiment stations recommend this type bait as giving most effective control. Rats love it. Less waste than with grain type baits. Easy and economical to use. POSTPAID PRICES: 1 lb. **95c**; 2 lbs. **\$1.60**; 5 lbs. **\$3.25**.

WARFARIN CONCENTRATES. Standard full strength concentrate to be mixed one part to 19 parts with fresh cornmeal, ground oats, or oat groats. More economical to use when you mix your own bait. Proven effective control. POSTPAID PRICES. 1/4 lb. **\$1.75**; 1/2 lb. **\$3.00**.

WATER SOLUBLE BAITS. The use of water soluble bait is highly recommended in combination with the regular Warfarin dry baits as rats will consume about three times as much liquid as they do dry feed. When used in combination positive control will be effected in much less time usually in from 3 to 5 days. Water soluble baits are easy and inexpensive to use simply by following directions. PRICE: **39c** Packet. POSTPAID.

TWO YEAR FIELD GROWN STOCK

NO. 6143 DELCON. A pint-sized tree that bears big-sized fruit. Trees grows about 1/2 normal size. Fruit has distinctive flavor from its parental cross of Delicious, Jonathan and Ben Davis. Fruit ripens about 2 weeks earlier than Delicious. **No. 6143**—4-5 ft. trees **EACH \$2.25; 3 for \$6.30 POSTPAID.**

NO. 6121 JONADEL. A sensational flavored apple combining Jonathan and Delicious. Beautiful bright red, blight resistant fruit. Wonderful for eating fresh and when it comes to fresh apple pie it has no equal. Retains crisp tangy flavor all winter. 5-6 ft. trees **EACH \$2.65; 3 for \$7.65 POSTPAID.**

STANDARD SIZE TREES - AS LOW AS \$1.10 EACH

NO. 6116—DARK RED JONATHAN. The flavor and all around good quality of the Jonathan apple is unsurpassed by any winter variety. Berry's healthy, vigorous trees start bearing fruit early. Large deep red fruit is excellent for eating fresh, for pies, for baking, or for jelly. Fine for winter storage, retains its firm, crisp flesh for many months.

NO. 6107—YELLOW DELICIOUS. Best of the Yellow apples with extra large, beautiful golden yellow fruit. A favorite among commercial raisers as well as for small home orchards. One of the heaviest bearing varieties. Unusually hardy and normally will start bearing within two to three years.

NO. 6108—DOUBLE RED DELICIOUS. The crisp, zestful flavor of these huge, red delicious apples are unexcelled for eating fresh. They come on early in the fall and retain their firm flesh and delightful flavor throughout the winter months. Truly America's favorite red apple.

NO. 6105—WEALTHY. An extra heavy bearing variety of unusually large, bright red fruit. Ripens in September and stores well for several months. A real hardy dependable producer of fine-flavored fruit. Particularly recommended for cooking or pies.

NO. 6104—RED McINTOSH. A medium sized, early fall variety. A good producer for many years. Fruit is darker red than most and the fresh extra firm, snow white color. Juicy tart flavor makes it excellent for cider, but we recommend it as being our No. 1 choice for an all-purpose apple.

NO. 6113—YELLOW TRANSPARENT. One of the earliest maturing varieties. Large, yellow, tender juicy fruit ripens in mid-July. Trees are extremely hardy for any area. Mellow, spicy flavor. Excellent for pies and sauce.

NO. 6112—STAYMAN WINESAP. Stores better than any other winter variety. Beautiful red colored fruit with crisp delightful flavor. A heavy bearing variety of extra large sized fruit. A real favorite with home orchard growers.

NUT TREES

CARPATHIAN

ENGLISH WALNUT

No. 6882

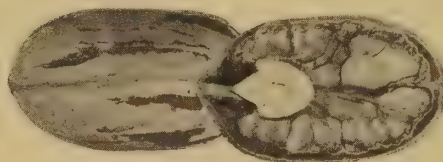

A new hardy, strain of real-honest-to-goodness English Walnuts that can be grown as far north as southern Minnesota. We recommend planting at least two so they can cross-pollinate. These healthy, sturdy trees produce thin shelled, fine flavored nuts just like the ones you have been buying in your favorite grocery stores. We recommend planting about 30 to 40 feet apart. **We can ship these trees in spring or fall.**

2-3 ft. trees..Each \$3.95; 3 for \$11.25 POSTPAID.

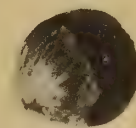

HARDY PECANS

No. 6891

Hardy as far north as Central Iowa and similar areas. Plant about 50 ft. apart in spring or fall. Nuts are thin-shelled and deliciously flavored. The uniformly shaped trees have luxuriant green foliage which makes them decorative and attractive enough for your front yard. We recommend planting at least 2 or 3 for proper cross-pollination. Sturdy healthy 18-24 in. seedlings.

Each \$1.25; 3 for \$3.45 Postpaid

No. 6890—HAZELNUT

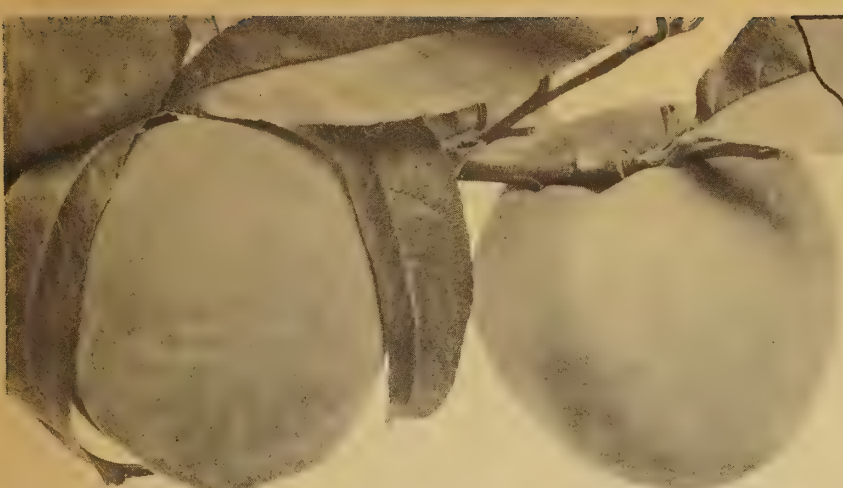

Hardy bush-like trees can be grown in limited space. Seldom taller than 12-15 feet. Nuts are formed in clusters of 3 to 5. Excellent flavor for using in cookies, cakes or other desserts. Can be planted in the spring or fall. Self-pollinating 12-18 in. size plants. Each **90c; 3 for \$2.25 POSTPAID.**

No. 6899—CHINESE CHESTNUT

A popular landscaping tree. These healthy, blight-resistant trees are hardy as far north as northern Iowa and similar areas. The nuts are large sized, sweet, fine flavored. They start to bear when quite young. 2 or more tree should be planted together for proper pollination. 3 year old 2-3 ft. size. Each **\$2.15; 3 for \$5.85. POSTPAID.**

No. 6886—Thomas Black Walnut

These healthy, fast growing trees start bearing very young. The nuts are unusually large sized and have a delicious distinctive flavor. Hardy for any area. Plant about 40 ft. apart. Supply limited. 2-3 ft. size. Each **\$3.75; 3 for \$10.50 POSTPAID.**

EARLY ELBERTA NO. 6402. Large sized, bright yellow fruit, firm juicy delectable flesh. Excellent for canning or eating fresh from the tree. A yellow freestone variety. Ripens about one week earlier than Elberta. One of the quickest varieties to bear after planting.

NO. 6403 ELBERTA. Yellow Freestone. A mid-season variety, very large in size, golden yellow with red cheek. Very productive, yielding large quantities of uniformly high colored fruit. Ripens early September. A very popular variety for home freezing or canning.

NO. 6406 HALE HAVEN. A large new yellow freestone, highly colored, with delicious rich sweet flavor. Excellent for freezing or canning and ripens about two weeks before Elberta. Self-pollinating. Hardy, vigorous trees.

NO. 6407 J. H. HALE. Midseason yellow freestone sometimes known as the Million Dollar Peach. Excellent flavor, tender, golden yellow flesh. Extra large size and is the "Giant" of peaches. For best results another variety should be planted in combination with J. H. Hale. A good all around peach.

NO. 6413 POLLY. Large pink colored fruit with white sweet delicious flesh. Has no equal for preserves or sauce. Midseason. Unusually hardy, self-pollinating, and ripens just before Elberta. Our favorite for delicious tree ripened flavor.

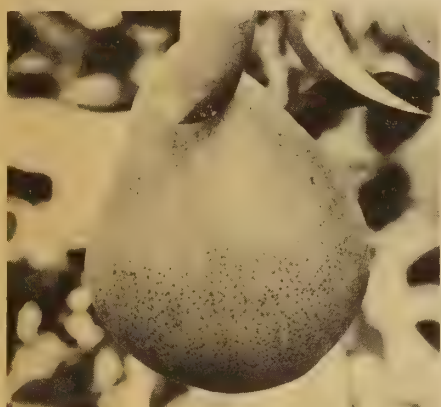

NO. 6405 GOLDEN JUBILEE. Extra early yellow freestone. Should ripen by July 20th. Very hardy and usually blooms after danger of frost. Bears very large fruit of excellent flavor.

NO. 6307 BING CHERRY

Huge dark red, glossyskinned fruit. Sweet and flavorful. Good for freezing or eating right from the tree. Hardy, healthy trees. Trees are ornamental enough for front yard planting.

NO. 6301

BLACK TARTARIAN

The most popular sweet cherry. Large, purplish black, delicious fruit. Firm, meaty and keeps well. Grows well on most soil types. Very hardy and long lived.

PLUMS

Berry's plum trees are sturdy, healthy and carefully selected, 2-year field grown stock. Only the hardiest, disease free varieties are offered and we recommend those listed below from northern Iowa and similar areas on south. Plum trees north of that area need some winter protection. For best results at least two varieties should be grown for cross pollination. Plant trees about 15-20 ft. apart. Shipped for spring or fall planting postpaid.

NO. 6508 STANLEY. The best of all the older prune-type plums. Large to medium size. Delightful flavor when allowed to fully ripen. Beautiful purple color when ripe—flesh greenish.

NO. 6507 GREEN GAGE. A very popular yellowish green fruit. Flesh pale green and very sweet flavored. Ripens mid-August. Do not raise north of Central Iowa or similar areas.

NO. 6506 ITALIAN PRUNE. Medium large, dark bluish purple color. Delicious flavored yellow flesh. Excellent for canning or drying and unsurpassed when fully ripe for eating out of hand.

NO. 6504 TOKA. Rich spicy flavored. Beautiful red fruit that ripens in August. Very hardy and vigorous. Freestone type and good producer.

NO. 6546 SUPERIOR. Ripens early August. Very large red fruit of excellent sweet flavor. Hardy and good pollinizer for other varieties. State catalog No. and quantity. Be sure to tell us your nearest express station. **ALL PREPAID.**

MULTIFLORA ROSE

Wonderful for field or yard fencing, for shelter belts or erosion control. Excellent for wildlife refuge. When trimmed makes a very attractive hedge. Makes a dense thorny barrier 2-6 ft. high in two years. Easy to grow and easy to eradicate when no longer needed. Has white flowers in the spring followed by red fruits. Hardy to northern Iowa and similar areas. Our large quick growing bushes are already pruned back ready for planting.

SEEDLING TREES FOR WINDBREAKS

Fine protection from wind and snow. Prevents soil erosion. Healthy, fast growing seedlings that require little care and practically no trouble in planting. Can be transplanted in two years to permanent locations. We recommend planting in rows for easy cultivation. Plant the seedlings 12-24 inches apart. Most of the shade tree seedlings should be 5-6 ft. tall in two years.

BERRY'S ROSE & FLORAL DUST

Most effective fungicides known for control of black spot and powdery mildew. Contains new PHALTAN and KARATHANE. Easy-to-use plastic squeeze duster. Large 10-oz. size \$1.39 POSTPAID.

FLORIBUNDA ROSES

5158—CIRCUS (Pat. 1382). The only rose selected for All America honors in 1956. Perfectly formed buds of brilliant yellow blended into orange red tones as the petals begin to unfold. Delightfully fragrant flowers of varied colors ranging from orange bronze to light cream and pinks. Short bushy plants seldom growing more than 2 feet tall. A very heavy flowering type that is ideal for beds or borders. Each \$2.50, 3 for \$6.60 POSTPAID.

5151—FASHION (Pat. No. 789). A heavy blooming very fragrant semi-double type rose. Probably the most popular of all the floribundas. An All-America award winner in 1950. Small oriental-red buds open into a luminous pink overlaid with gold. Blooms from June until late fall. Plants seldom grow more than 24 inches tall. You will be delighted with this exquisite rose. Prices Each \$2.00; 3 for \$5.25 POSTPAID.

5150—RED PINOCCHIO (Pat. No. 812). Warm rich carmine blooms that have a lustrous velvety cast as the flowers open. Blooms are 3 to 4 inches across and in large clusters. Long lasting blooms are excellent for cutting. A steady flowering type from June until fall. Prices Each \$1.75; 3 for \$4.65 POSTPAID.

5153—IVORY FASHION (Pat. No. 1688). A 1959 All-America selection and fast becoming one of the most popular floribundas. Perfectly formed neat buds and blooms of gardenia white borne on long slender stems. The blooms are long lasting and measure as much as 4 inches across. The finest white rose in many years. Prices Each \$2.75; 3 for \$7.20 POSTPAID.

PATENTED

HYBRID TEA ROSES

5021—PEACE. A truly great rose that combines enormous size with long lasting beauty and delicate coloring. The perfectly formed pink buds slowly open to a magnificent large bloom that varies in color from canary yellow, pale ivory cream to a pearly white edged in apple blossom pink. We have seen blooms that would measure 6 to 7 inches across with as many as 12 blooms at one time on heavy caned vigorous growing plants. No rose garden is complete without the presence of the ever popular, varicolored Peace rose. Prices Each \$2.50; 3 for \$6.60 POSTPAID. (Pat. No. 591)

5004—CHRYSLER IMPERIAL. A favorite of the rose red varieties. A magnificent and unusually large very double bloom that measures about the same size as Peace described above. A pleasing rich colored bloom on heavy long stems. Long lasting blooms for cutting that you will enjoy for many days. The beauty and fragrance of Chrysler is unexcelled in any other red rose. Prices \$2.50 each; 3 for \$6.60 POSTPAID. (Pat. No. 1167)

5024—KORDES PERFECTA. A completely different new variety that should be included in every rose garden. Large very double blooms so perfectly shaped they seem artificial. The blooms are creamy white, blending into a soft glowing pink color at the outer edges of the petals. A sensational German introduction that is bound to become as popular as the Peace rose described above. Prices \$3.50 each; 3 for \$9.00 POSTPAID. (Pat. No. 1604)

5014—HELEN TRAUBEL. One of the most popular hybrid teas and one that you will be proud to grow in your rose garden. Delightfully colored, perfectly shaped buds and blooms on long strong stems. The blooms are a warm rich pink color with an undertone of soft apricot. The blooms retain their original color when even fully opened. We consider Helen Traubel one of the best all round roses for color, form and fragrance. Each \$2.75; 3 for \$7.20 POSTPAID. (Pat. No. 1028)

CLIMBING ROSES

5107—IMPROVED BLAZE. The most popular of all the climbers. An extravaganza of fiery red color from hundreds of brilliant blooms. A spring blooming type that is extra vigorous and hardy. Makes an amazing growth in just a short period of two years. Bright red blooms do not fade even in the hottest summer weather. Prices No. 1 Grade Each \$1.30; 3 for \$3.75. No. 1½ Grade each \$1.10; 3 for \$3.00 POSTPAID.

5114—GOLDEN SHOWERS (Pat. 1557). An All America selection in 1957. Bright golden yellow buds and blooms from early spring until late fall. Extra heavy strong canes that make the plant almost self-supporting. Long almost thornless stems ideal for cutting. Attractive dark green glossy foliage. Prices No. 1 Grade Each \$2.75; 3 for \$7.20 POSTPAID.

5105—DR. J. H. NICOLAS (Pat. 457). Perfectly shaped large fully double deep pink blooms. Flowers from late spring until frost. Very fragrant. Blooms often measure 5 to 6 inches across. Normally blooms the first year. Most anyone can find a spot for a rose of this type in your garden. Prices No. 1 Grade Each \$1.30; 3 for \$3.75. No. 1½ Grade Each \$1.10; 3 for \$3.00 POSTPAID.

LAWN GRASSES AND SUPPLIES

A well kept vigorous growing lawn not only enhances the appearance of your home but increases the value as well. Careful selection of lawn seed is one of the most important considerations whether planning a new seeding or renovating an old lawn. Sow lawn grass seed just as early as the ground can be thoroughly worked even though the frost has not left. This helps in getting the lawn well established before hot dry weather and before there is too much competition from weeds that are present in all soils.

Well worked seed beds are necessary for best results. Sow at least one pound seed for each 200 sq. ft. Divide the seed in two parts then sow half one way and the remaining half the other direction. Rake or roll the soil carefully after seeding. Ask for our special bulletin on lawn care.

BERRY'S SUPREME LAWN MIX

Our finest lawn grass mixture. Contains about 60% Kentucky Blue Grass, 20% Bent Grass and 20% Perennial Rye Grass. Treated with our special Gro-Coat Brand formula to insure quick germination and sturdy vigorous growth. Grows well in any soil, in sun or part shade. One pound will sow up to 300 square feet. Enjoy a lawn that will stay green all year even in the hottest part of summer. Prices: 1 lb. 90c; 3 lbs. \$2.50; 5 lbs. \$3.65 POSTPAID.

BERRY'S ALL GREEN MIXTURE

Don't compare Berry's All Green Mixture with other inexpensive blends, because we use only top grade seed in every respect. This quick growing mixture should be seeded 1 lb. to 200 sq. ft. It contains primarily Domestic and Perennial Rye Grass, smaller amounts of Kentucky Blue Grass and Fescue. Should start to germinate under favorable conditions in 5 or 6 days and is guaranteed to grow if planted according to directions and if proper care is given. A fine mixture for sowing later in the season then following in the fall with a straight seeding of Kentucky Bluegrass. Prices. 1 lb. 45c; 3 lbs. \$1.25; 5 lbs. \$1.95 POSTPAID.

SURE GROW LAWN MIXTURE

A well balanced mixture adapted to practically any soil types and hardy in any area. We recommend it for areas which may have heavy traffic, such as playgrounds or backyards. Contains Kentucky Bluegrass, Tall Fescue, Rye Grass and Creeping Red Fescue, all of highest purity and germination. Very economical to sow and 1 lb. should be used on about 250 sq. ft. All of our lawn grass is protected by our special Gro-Coat formulation which keeps the seed from rotting in the ground and assures you of more vigorous healthy stands. PRICES: 1 lb. 60c; 3 lbs. \$1.65; 5 lbs. \$2.50; 25 lbs. \$11.25 POSTPAID.

BENT GRASS

Bent grasses make luxuriant, smooth lawns—the same kind you expect to find on well kept golf greens. We offer only the Highland type bent as we consider it better adapted because of the excellent turf forming characteristics. Where time and funds for maintenance are limited we recommend using our supreme lawn mixture as bent grass requires daily care. Highland Bent has an unusual blue-green hue and holds its color during the winter months better than other strains. POSTPAID PRICES: 1 lb. 75c; 3 lbs. \$1.95; 5 lbs. \$3.00; 10 lbs. \$5.50.

ZOYSIA JAPONICA

A new strain of Zoysia that requires only occasional mowing. Tough, wear-resistant, and provides an extremely thick, cushiony turf that has a tendency to choke out weeds and crab grass. It does not require extensive fertilizing and thrives under nearly all conditions. Some prefer to establish a Zoysia lawn from plugs or stolons but we believe that seeding is much cheaper as a pound will sow around 400 sq. ft. Seeding instructions are provided with each order. POSTPAID PRICES: 1 lb. \$3.75; 3 lbs. \$10.75; 5 lbs. \$17.50.

GARDEN HOSE

Our finest all rubber garden hose. Full 3/4 inch inside diameter. Double braid. Extra durable, seamless rubber tube. Two-braid high strength reinforcement. Solid brass full flow couplings.

2009—25 ft. \$7.39
2009—50 ft. \$13.39
POSTPAID

Nylon Reinforced Vinyl Hose

Full 1/2 inch inside diameter. Outperforms all other hose. Nylon tire cord 3 ply construction. Allows shut-off at nozzle even in hottest weather. Light, flexible, non-kinking. Unconditionally guaranteed. No. 8912. 25 ft. length \$3.79; No. 8912. 50 ft. length \$6.79 POSTPAID.

CREeping RED FESCUE

A fine round bladed grass that thrives in all types of soil. The best lawn grass for shady areas. Is very hardy and maintains its color the year around. When used straight sow 1 lb. to 150 sq. ft. or in lawn mixtures about 1/3 Creeping Red Fescue to 2/3 Bluegrass and Rye Grass. POSTPAID PRICES: 1 lb. 90c; 3 lbs. \$2.40; 5 lbs. \$3.50.

CHEWINGS FESCUE

Does well on any kind of soil. Good for areas such as playgrounds and athletic fields. Grows in either sun or shade. Should not be cut less than one or one-half inches high. Sow one pound to 200 square feet. PRICE POSTPAID: 1 lb. 90c; 3 lbs. \$2.40; 5 lbs. \$3.65.

WHITE CLOVER

Commonly known as White Dutch. Very popular for lawns. Growth starts early in spring and stays green after mowing. Grows in all types of soil. Is drought resistant and helps soil fertility. A pound sows 1000 or more square feet. POSTPAID PRICE: 1 lb. \$1.20; 3 lbs. \$3.30; 5 lbs. \$4.80.

Gilmore Hosemaster Nozzle

The World's best hose nozzle. Automatic spray control saves water. Easy to use and adjust. Exclusive pistol grip control. Leak proof and clog proof. Non-corrosive, lifetime metallic finish. POSTPAID PRICE: \$1.50 each.

FERTILIZER-INSECTICIDE SPRAYER

Makes up to 100 gallons of spray. No pre-mixing necessary. Use any type of spray desired with perfect automatic mixture of water and liquid chemicals. Accurate adjustable metering system. Unbreakable pint sized container. POSTPAID PRICE. \$5.95

KENTUCKY BLUE GRASS

The basic grass of all good lawns and lawn grass seedings. One of the finest all-purpose grasses as well. We harvest and process our own Bluegrass from carefully inspected weed free fields. Can be sown in spring or fall and for new seedings we recommend 5 lbs. to 1000 square feet. With proper care and fertilization will supply a dark green thick heavy lawn.

Heavy, refined. 1 lb. \$1.10; 3 lbs. \$3.00; 5 lbs. \$4.50; 10 lbs. \$8.00 POSTPAID.
Extra Heavy, Faster Growing. 1 lb. \$1.35; 3 lbs. \$3.75; 5 lbs. \$6.00 POSTPAID.

PARK BLUE GRASS

An extremely hardy new variety developed in Minnesota. 1 lb. will sow about 300 sq. ft. Germinates in 8 to 12 days. Disease resistant and easy to grow. Faster growing and goes farther than regular. 1 lb. \$1.60; 3 lbs. \$4.65; 5 lbs. \$7.50 10 lbs. \$14.50 POSTPAID.

MERION BLUE GRASS

A new blue grass with deep heavy roots permitting it to stay green longer during hot weather when other varieties 'burn out.' Darker green color and spreads faster in new seedings. Easy to maintain and requires less frequent cutting. Heavy cushioned turf crowds out weeds. One pound sows 400 sq. ft. Price: 1 lb. \$2.10; 3 lbs. \$5.95; 5 lbs. \$9.50; 10 lbs. \$18.50 POSTPAID.

EVEREADY WEED KILLER

A dual purpose selective weed killer for control of broadleaf lawn weeds and woody plants. The combination of 2,4-D and 2,4, 5-T saves buying two separate mixtures. Follow directions carefully for efficient application. Controls poison ivy, dandelion, buckhorn and many others.

Prices: 8 oz. \$1.19; 1 qt. size \$2.98 POSTPAID.

ACME CRABGRASS CONTROL

The newest and most popular of all Crabgrass killers. Pint covers 1600 sq. feet. Spray and sprayer all in one. Just attach to hose and spray. Gives excellent control in Blue grass, Merion Bluegrass or Zoysia. Easy to use and effective. POSTPAID PRICES. 1 pt. (with hose nozzle) \$2.35; Quart (refill) \$3.50.

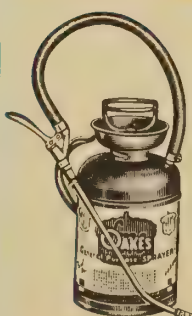

DIELDRIN GRANULES

Easy to use, effective control of beetle, grubs, ants, crickets, army worms, webworms and wireworms. Sprinkle on lawn or flower bed then work into lawns or soil. Water for effective control. Easy and safe to use. Gives long lasting control of most lawn insects. Prices: 15 oz. Canister \$1.19; 3 lb. Canister \$2.69 POSTPAID.

CHLORDANE DUST

A multi-purpose insecticide containing 10% Chlordane. Kills by contact. For control of Japanese beetle, grubs, ants, lawn moss, cutworms, chiggers and many other pests. Use as dust or soluble spray. Dust around foundation to prevent insects from entering homes. Prices. 1 lb. Canister 69c each; 5 lb. bag \$1.98 POSTPAID.

E-Z FILL TANK SPRAYER

Ideal size for numerous home-spraying jobs in and outside the home. Designed for dispensing all types of spray solutions. Made of heavy galvanized steel electric seam welded. Pump is 1 3/4 x 6 inches seamless brass tubing. Oil treated leather plunger. 20 inches heavy duty rubber hose and 11 inch brass extension tube. Equipped with leakproof shut-off valve. Nozzle spray pattern quickly adjustable from mist to solid stream. Tank 13 inches high. Capacity 1 1/2 gallons. Easy to clean after using. Prices: No. 2010—\$8.79; No. 2005—3 1/2 gal. capacity \$10.69 ALL POSTPAID.

HARDY LILLIES FOR SPRING OR FALL

E The lillies listed below will come up year after year under normal conditions, with little or no care. In the extreme northern areas where winters are unusually severe we recommend a winter mulch for best results. All these lillies will bloom this season.

3705—RUBRUM. Tall, stately plants with large bright pink flowers edged with white. Blooms are flecked with dark ruby spots. Blooms in August and September. Plant in a spot with partial afternoon shade, 18 in. apart and about 7 in. deep. Healthy giant sized bulbs.

3716—FLAME. 2-3 ft. plants with brilliant distinctive orange red blooms. Free blooming with as many as 12 or 15 flowers on a single stem on old established plants. Flowers in late spring. Plant 7 in. deep.

3717—HENRYI. Brilliant golden yellow flowers flecked with brown. Grows 3-4 ft. tall with long sturdy stems. Blooms late summer and early fall. Extremely vigorous and hardy.

3706—REGAL. America's favorite hardy lily. Large richly colored white trumpet shaped flowers with rich deep golden centers. Very fragrant. Blooms in June-July. Plant 24 in. apart 7 in. deep. WILL BLOOM THIS SUMMER.

BERRY'S BARGAIN COLLECTION

1 each of above 4 lillies, large sized healthy bulbs. Save 15% over single price. No. 3711—All 4 **\$1.75 POSTPAID**

HARDY PHLOX

H Berry's Phlox are all field grown, sturdy, vigorous plants. They are hardy for any area and will bloom for many years.

2003—PRIME MINISTER. Large pure snow-white florets with deep maroon eye. Flower heads are 6-7 in. across. Plants grow to 3 ft. tall.

2021—STARLIGHT. Rich velvety purple with white star shaped center. Large flowering clusters borne on tall sturdy plants. Beautiful and distinctive florets.

2023—SAN ANTONIO. Brilliant non-fading purple-red florets on well rounded large clusters. A favorite with most gardeners.

2034—APPLE BLOSSOM. Uniformly shaped delicately pink florets with contrasting brilliant colored eye. An exquisite contrast to the more brilliant reds and purples.

2033—PURPLE SWEETHEART. A new velvety deep purple with florets so perfect they almost look artificial. Very free-blooming. 24-30 in. tall.

5314—FORSYTHIA. The very first shrub to bloom in early spring. The bell-shaped bright yellow blossoms cover the branches before the leaves come out. An attractive all year plant because of its heavy foliage of uniformly shaped dark green leaves. Maximum height 8 ft. Plants are large with long graceful sweeping branches. Grows best in sunny areas. 2/3 ft. plants ea. \$1.35; 3 for \$3.75 POSTPAID.

5478—BEAUTY BUSH. Graceful sweeping branches completely covered in early spring with very fragrant white-pink blossoms. Hardy for any area. Maximum ht. 7 to 8 feet. Ideal for screening hedges. A favorite flowering shrub for many years. Plant in well drained sunny areas. 18/24 in. size Ea. \$1.10; 3 for \$3.00. 2-3 ft. size Ea. \$1.35; 3 for \$3.90. ALL POSTPAID.

5450—OLD FASHIONED SNOWBALLS. Blooms start in May with round ball like clusters of pure snow white flowers. This type pictured on bush above. 18/24 in. plants. ea. \$1.20; 3 for \$3.45; 2/3 ft. plants \$1.60; 3 for \$4.65.

5451—PINK SNOWBALL. Light Pink until full bloom when they change to white. Seldom grows in excess of 6 ft. Leaves change color to yellow and red in fall. Hardy anywhere. 12/18 in. plants Ea. \$2.95; 3 for \$8.50. ALL POSTPAID.

5344—GOLDEN PRIVET HEDGE. Beautiful golden yellow foliage lasts through entire growing season and gives the attractively shaped bushes a flower-like appearance. Excellent for trimmed hedges, screens or corner plantings. Plant 18-24 in. apart in sun or part shade. Fast growing but can be easily trimmed to any height. 15/18 in. size ea. \$1.25; 3 for \$3.45; 10 for \$1.50 POSTPAID.

5315—RED HONEYSUCKLE. Covered with thousands of bright, rose-red, fragrant blossoms in early summer. Develops small attractive red berries that hang on the bush throughout the summer and into the fall. This fast growing shrub thrives in sun or shade. Hardy anywhere. One of the first bushes to leaf out early in the spring. Excellent for using as a hedge screen or ornamental shrub. 18/24 in. plants ea. 89c; 3 for \$2.50. 2/3 ft. plants ea. \$1.10; 3 for \$3.15 POSTPAID.

5322—RED FLOWERING QUINCE. Branches are covered with scarlet flowers in the spring before the foliage appears. Branches are irregular in shape which gives them a unique attractive appearance when covered with dark green foliage. A very useful shrub that can be used as an individual planting, a shrub border, or background. Max. ht. 6/8 ft. tall. An old-fashioned shrub of proven garden merit. 18/24 in. plants 80c ea.; 3 for \$2.25; 10 for \$6.50. ALL POSTPAID.

new!

All-America Awards For 1960

Fire King

Garden Party

Sarabande

NO. 5002—GARDEN PARTY. (Pat. No. 1814) The new 1960 ALL-AMERICA Hybrid Tea Selection. Magnificent blooms all summer long. Extra large, perfectly shaped blossoms are Ivory-cream color delicately etched in Apple Blossom pink. Dark green glossy foliage. Large No. 1, heavy-caned bushes. Very long stems. EACH \$3.50; 3 for \$9.30 POSTPAID.

NO. 5164—SARABANDE. (Pat. 1761) One of the two 1960 ALL-AMERICA Floribunda selections. Unique, fiery orange-red semi-double blooms. Low growing and compact—ideal for borders or rose hedge. Loaded with heavy clusters of blooms from early summer 'til late fall. A real eye-catcher and a welcome addition to any rose garden. EACH \$2.50; 3 for \$6.60 POSTPAID.

NO. 5155—FIRE KING. (Pat. 1758) Brilliant vermillion red, perfectly formed blooms, 2 to 3 in. across. Bushels of flowers all summer long. Excellent long-lasting blooms for cutting. Buds are deep red on tall, thickly foliated plants. A French introduction the same as Sarabande described above. Extra heavy No. 1 bushes. EACH \$2.50; 3 for \$6.60 POSTPAID.

CRIMSON KING MAPLE →

The most ornate and decorative tree yet one that provides dense shade and symmetrical beauty. Brilliant colored crimson leaves that retain their color throughout the summer. A proud addition to any yard. Seldom grows to a height of more than 35-45 ft.

4-5 FT. TREES EACH \$4.00; 2 for \$7.50 POSTPAID.

No. SN 300 QUINTUPLET DWARF APPLE TREE

Five choice varieties of fruit on one small tree! These favorite varieties include Jonathan, Yellow Transparent, Red Delicious and McIntosh. In order to produce a tree of this type our nurserymen take a sturdy, vigorous growing tree and graft the individual varieties to its limbs. The result is a true variety of each type. Strong 1 1/8-1 1/2 in. size.

TUBEROUS BERGONIAS

Camellia Flowered
Double Begonias

1 each of above five colors

ONLY **89¢** POSTPAID

The brilliant, exotic bloom of the camellia type begonia is unequalled. Magnificent flowers from early summer 'til frost. The bold, yet delicate fibred colors cannot be found in any other plant. The large double blooms are so nearly perfect they look artificial. Begonias do best in a shady spot in your garden or as indoor blooms. Large 1 1/2-2 in. bulbs. Indescribable shades of Red, Copper, Yellow, Pink and White. Mention color wanted or buy our special collection of all shades. No. B100 Bold Red; No. B101 Camellia Pink; No. B102 Feather White; No. B103 Copper; No. B104 Desert Yellow. EACH 27¢; 3 for 69¢; 6 for \$1.29 POSTPAID.

WONDER BOY TOMATO

SENSATIONAL, NEW F₁ HYBRID

The very best of the new Hybrid varieties. Extra large, globular shaped fruit. Vigorous, heavy-yielding plants with strong, upright branches. Early maturing, disease resistant and easy to raise. Bright red, meaty flesh has that honest-to-goodness tomato flavor. Heavy foliage protects fruit from heat and sun-scald. A few of these plants out-produce dozens of standard varieties.

TRIAL PACKET (30 seeds) 49¢; Gardeners Packet \$1.00; 1/4-oz. \$7.00. **49¢**

Berry Seed Company, Clarinda, Iowa

Farm Seed Price List, January 1st, 1960

All prices are freight PREPAID to the entire shaded area shown on map page 16 of our catalog, if your order weighs 300 lbs. or more. Excluded are Spring Grains such as Oats, Wheat, Barley, Speltz and Rye. These items are all quoted F.O.B. nearest shipping point. On all orders for less than 300 lbs. or for any farm seed order shipped into other areas YOU MAY DEDUCT \$1.25 PER CWT. as a freight allowance, Spring Grains excluded, as mentioned above. Commercial truck shipments are forwarded freight collect (see page 16 of our catalog) but we will refund what rail freight charges would have been if you live in the PREPAID area. All quotations are for our famous Gro-Coated Brand seed unless otherwise specified.

WRITE US FOR SPECIAL QUOTATIONS ON LARGE QUANTITY ORDERS. WE WILL BE GLAD TO QUOTE YOU ON BOTH GRO-COATED AND NON GRO-COATED SEED IF YOU WILL JUST LET US KNOW THE QUANTITY AND ITEMS NEEDED.

THESE PRICES ARE GUARANTEED ONLY UNTIL FEBRUARY 23RD, 1960.
